

Bike Shed Storage – 2 Bikes

189cm x 128cm/74.4 x 50.3 inches

Owner's Manual / Assembly Instructions

Requires two people and takes 1-2 hours for installation.

Assembly Preparation

Owner's Manual

Before beginning construction, please check local building codes regarding footings, location, and other relevant requirements.

Assembly instructions:

We recommend reviewing all instructions and relevant information before starting. Follow the step sequence carefully to ensure successful assembly.

Flooring base:

Choose a level, square area with good drainage for the storage building. The base is not included in the kit, and you may need to purchase it separately or construct your own foundation and anchoring system. The foundation should be at least 10 cm larger than the base rail of the shed, with a minimum 10 cm thick concrete slab recommended.

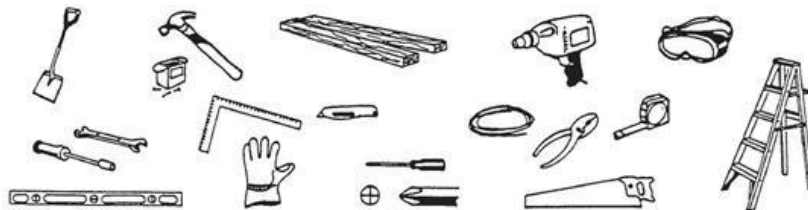

To reduce rising dampness from the soil and minimise condensation build-up in the shed, place a strong plastic sheet (at least 150µm thick) under the foundation. The storage building must be securely anchored to prevent wind damage. Once anchored, it is highly recommended to apply silicone along the inside of the base rail to help reduce condensation.

Parts and Parts List:

Before starting, ensure you have all the necessary parts for your building by referring to the Parts List page. Do not attempt assembly if any parts are missing, as an incomplete structure may be damaged by light winds.

Please remove the safety protection layer before assembly and retain the part number label if needed

Tools you need:

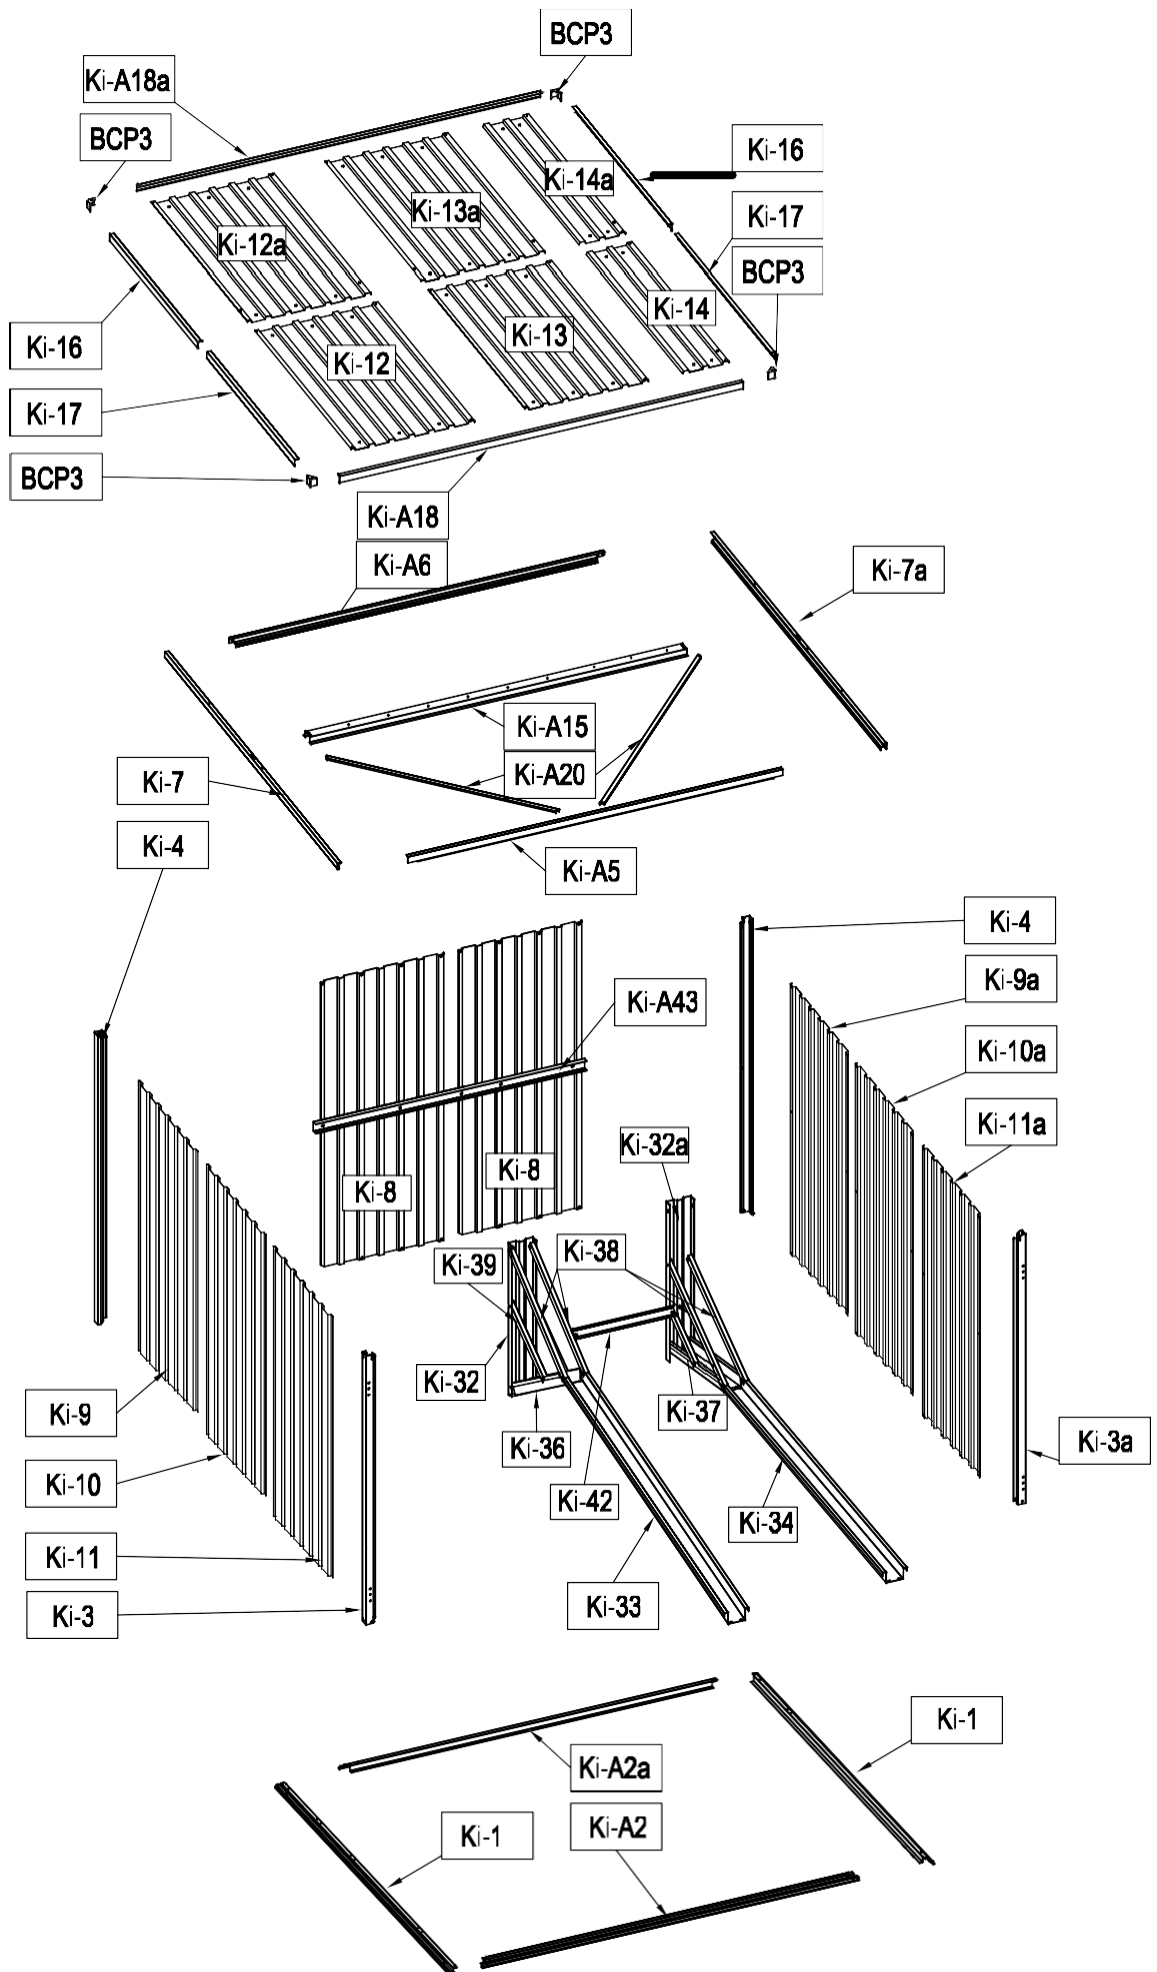

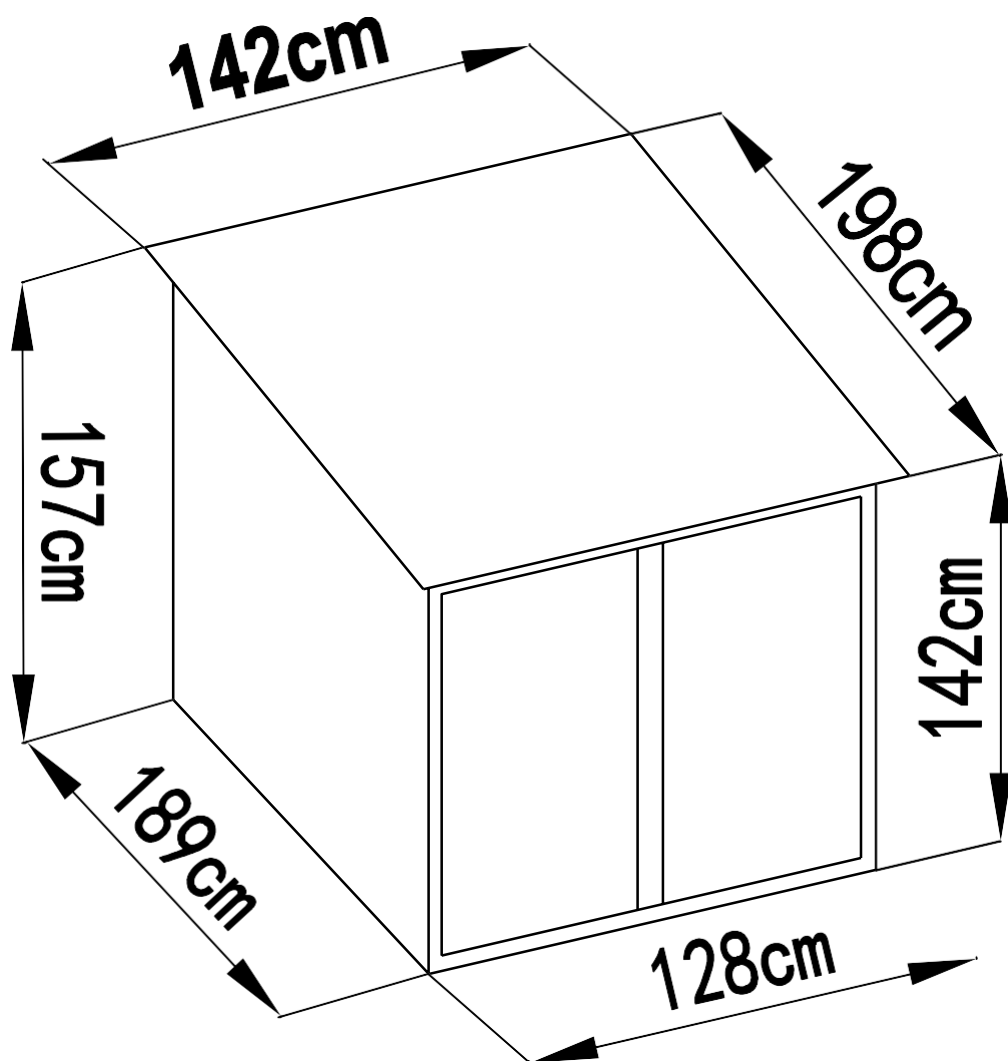

Safety must be put in the No. 1 position:

1. Choose a dry, calm day for assembly. Teamwork (two or more people) is required for the assembly process. It is recommended to complete the assembly in one day to avoid damage to the product or the loss of small parts. Keep all small parts (such as screws) in a bowl to prevent them from getting lost.
2. Always wear safety gloves, eye protection, and long sleeves during assembly to avoid injury. Be cautious of the sharp edges on some parts.
3. Always keep children and pets away from the construction site.
4. Never place your full weight on the roof of the building. When using a step ladder, ensure it is stable and safe to use.

Care & Maintenance:

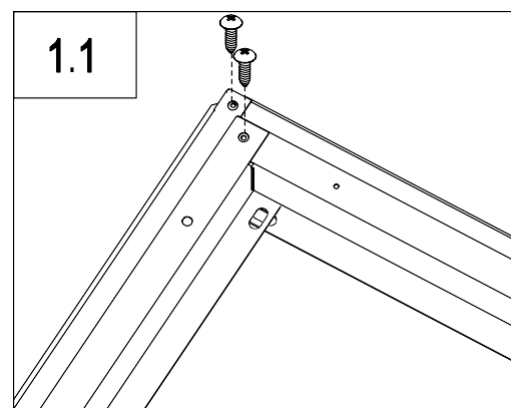

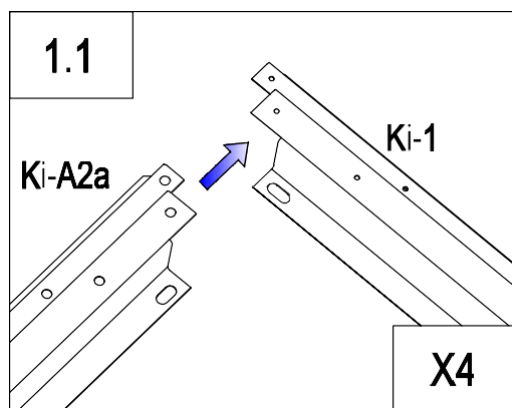

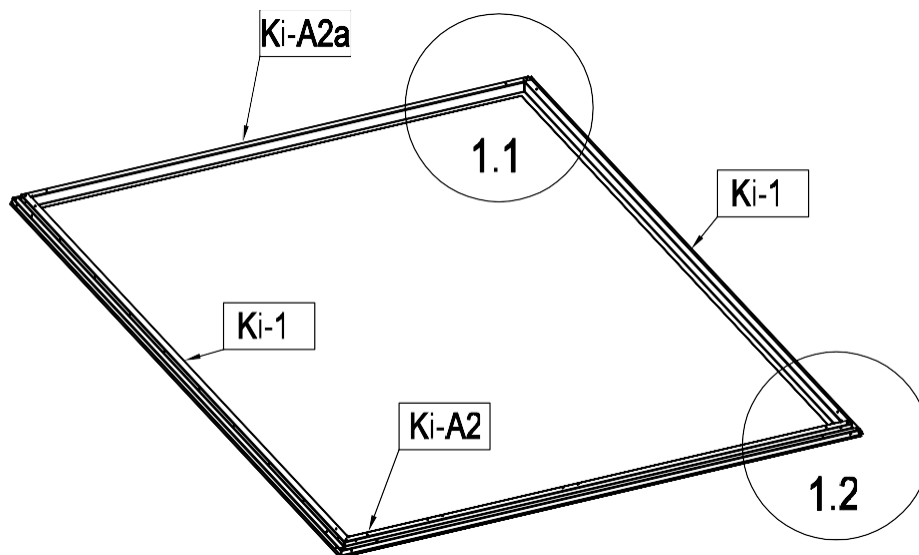

1. Clean the shed regularly with a soft cloth. Use water if necessary.
2. Keep the door tracks clear of dirt and debris to ensure smooth operation.
3. Remove snow from the roof using the appropriate tools to maintain safety and ensure it is safe to enter.
4. The shed is designed for storage, not for living purposes.
5. Apply oil to the top and bottom door sliding channels to ensure smooth door movement.
