## Notice:

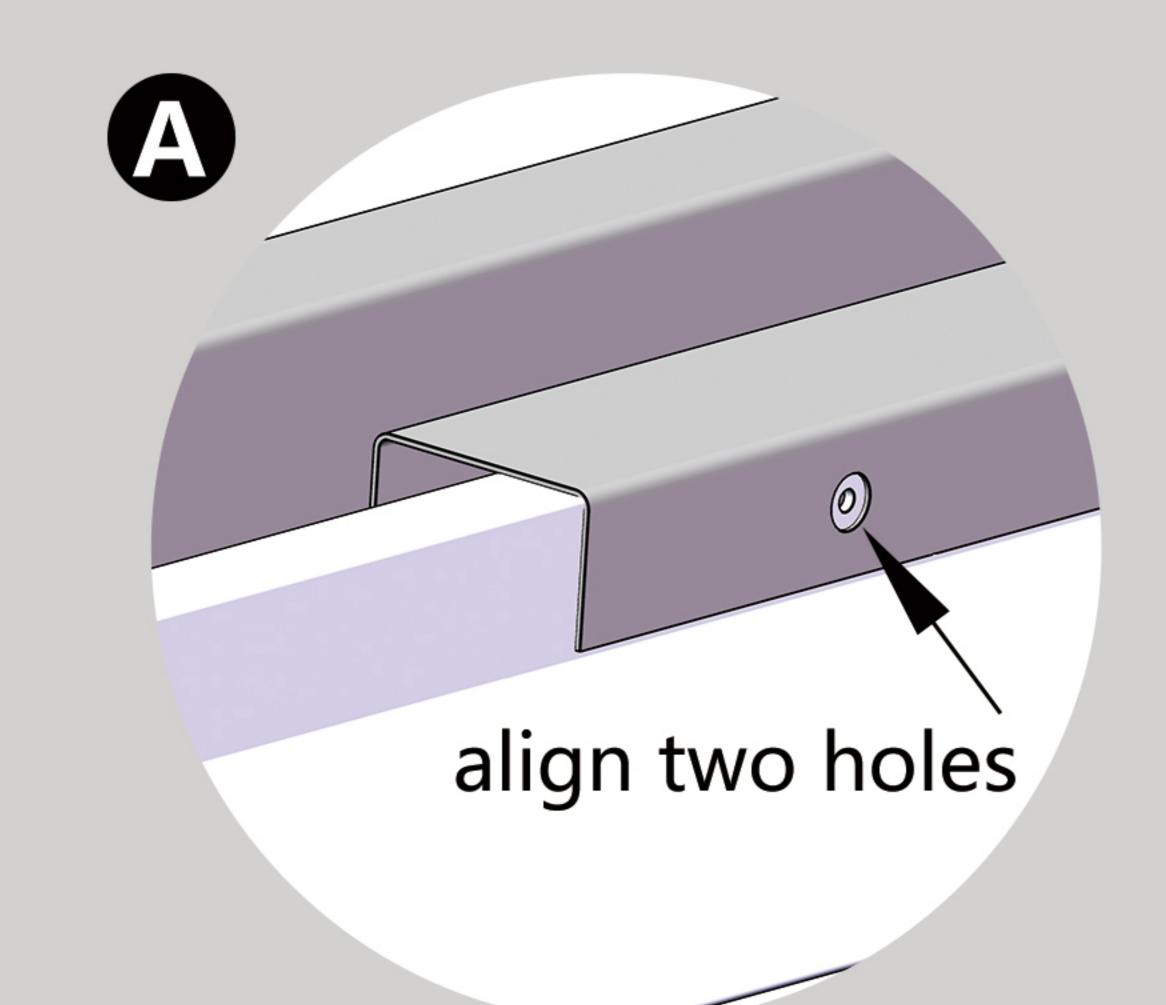

You do not need to install screws in this step. Align the holes, which are the same as in the previous step.

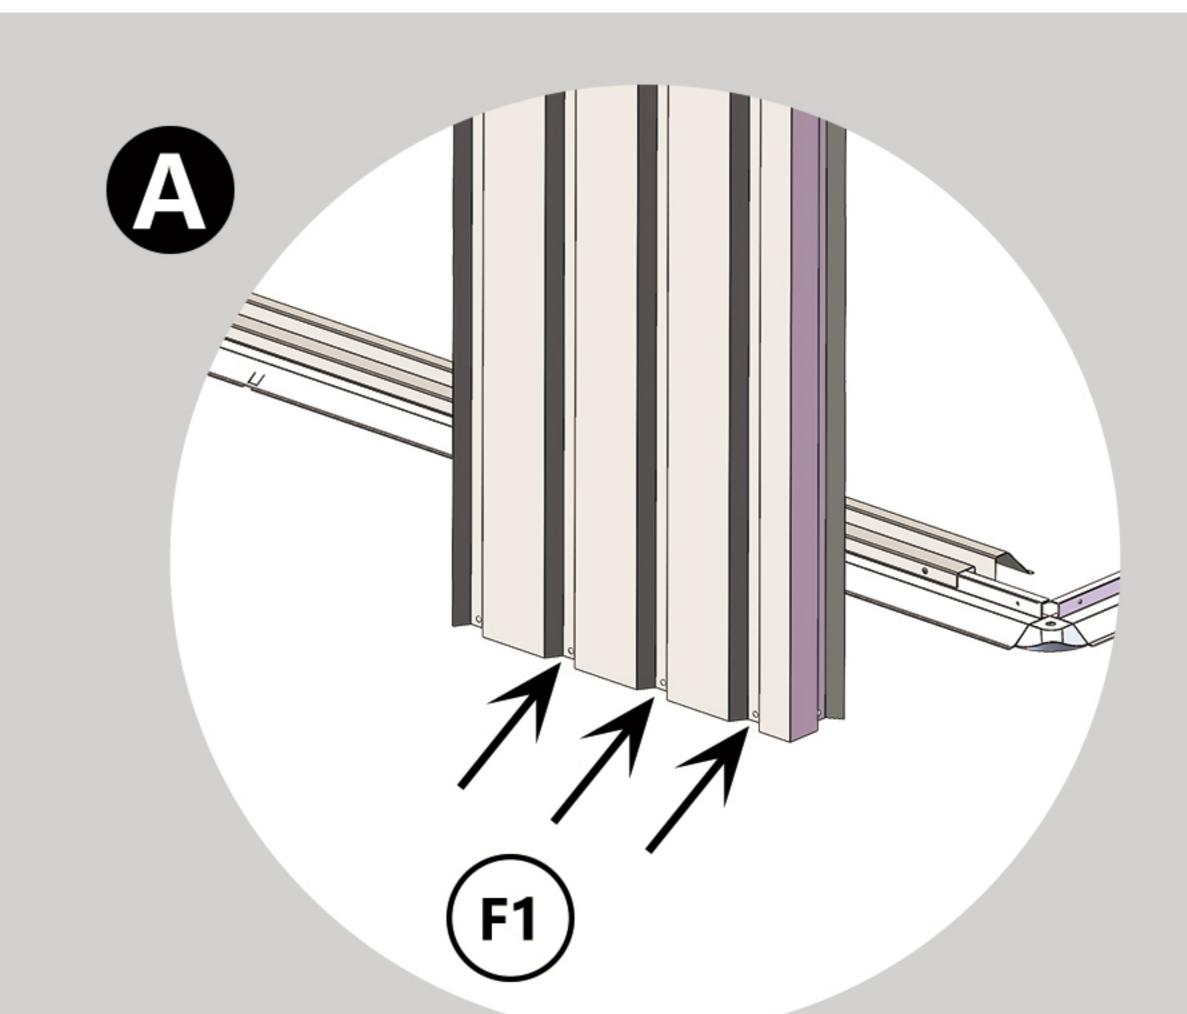

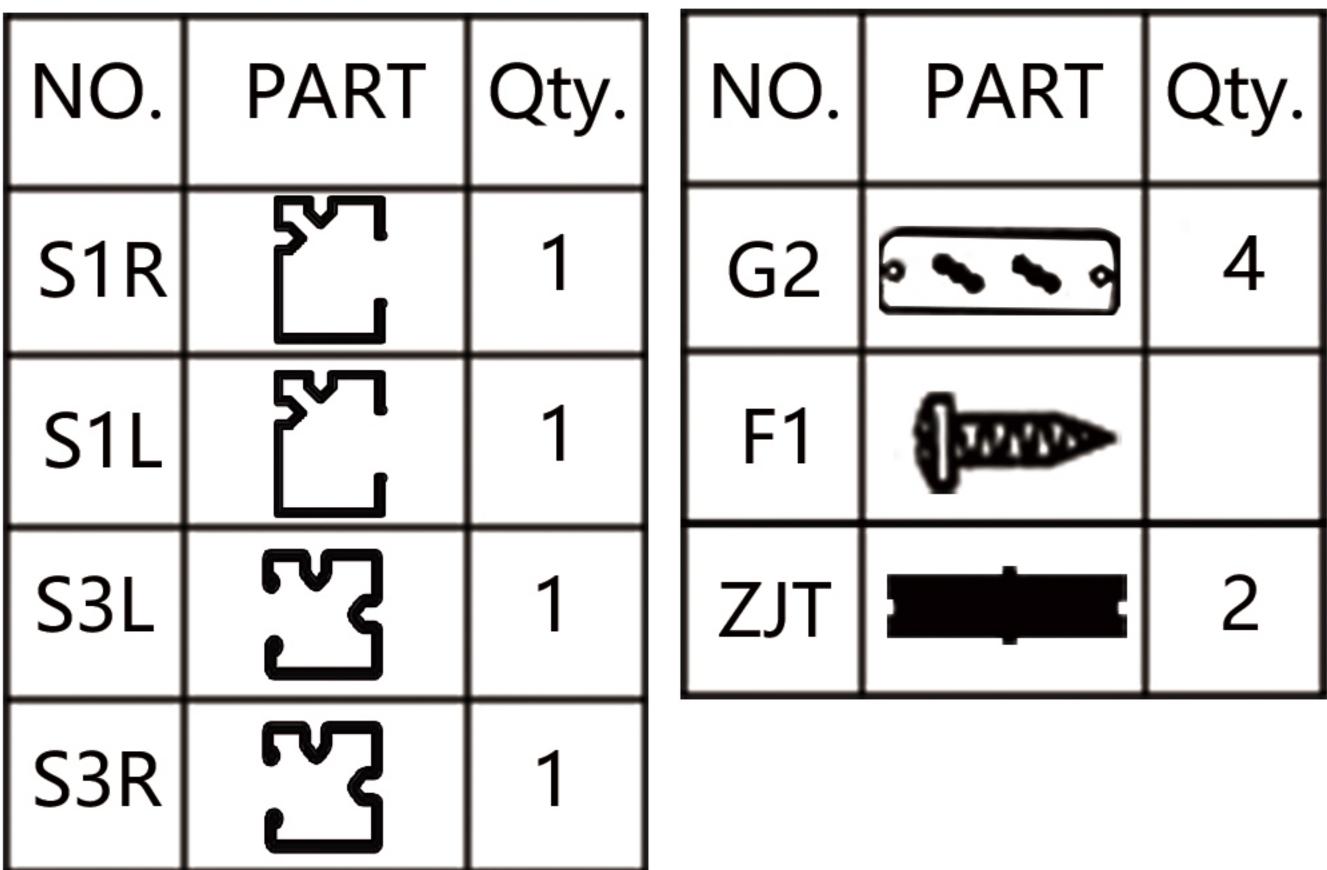

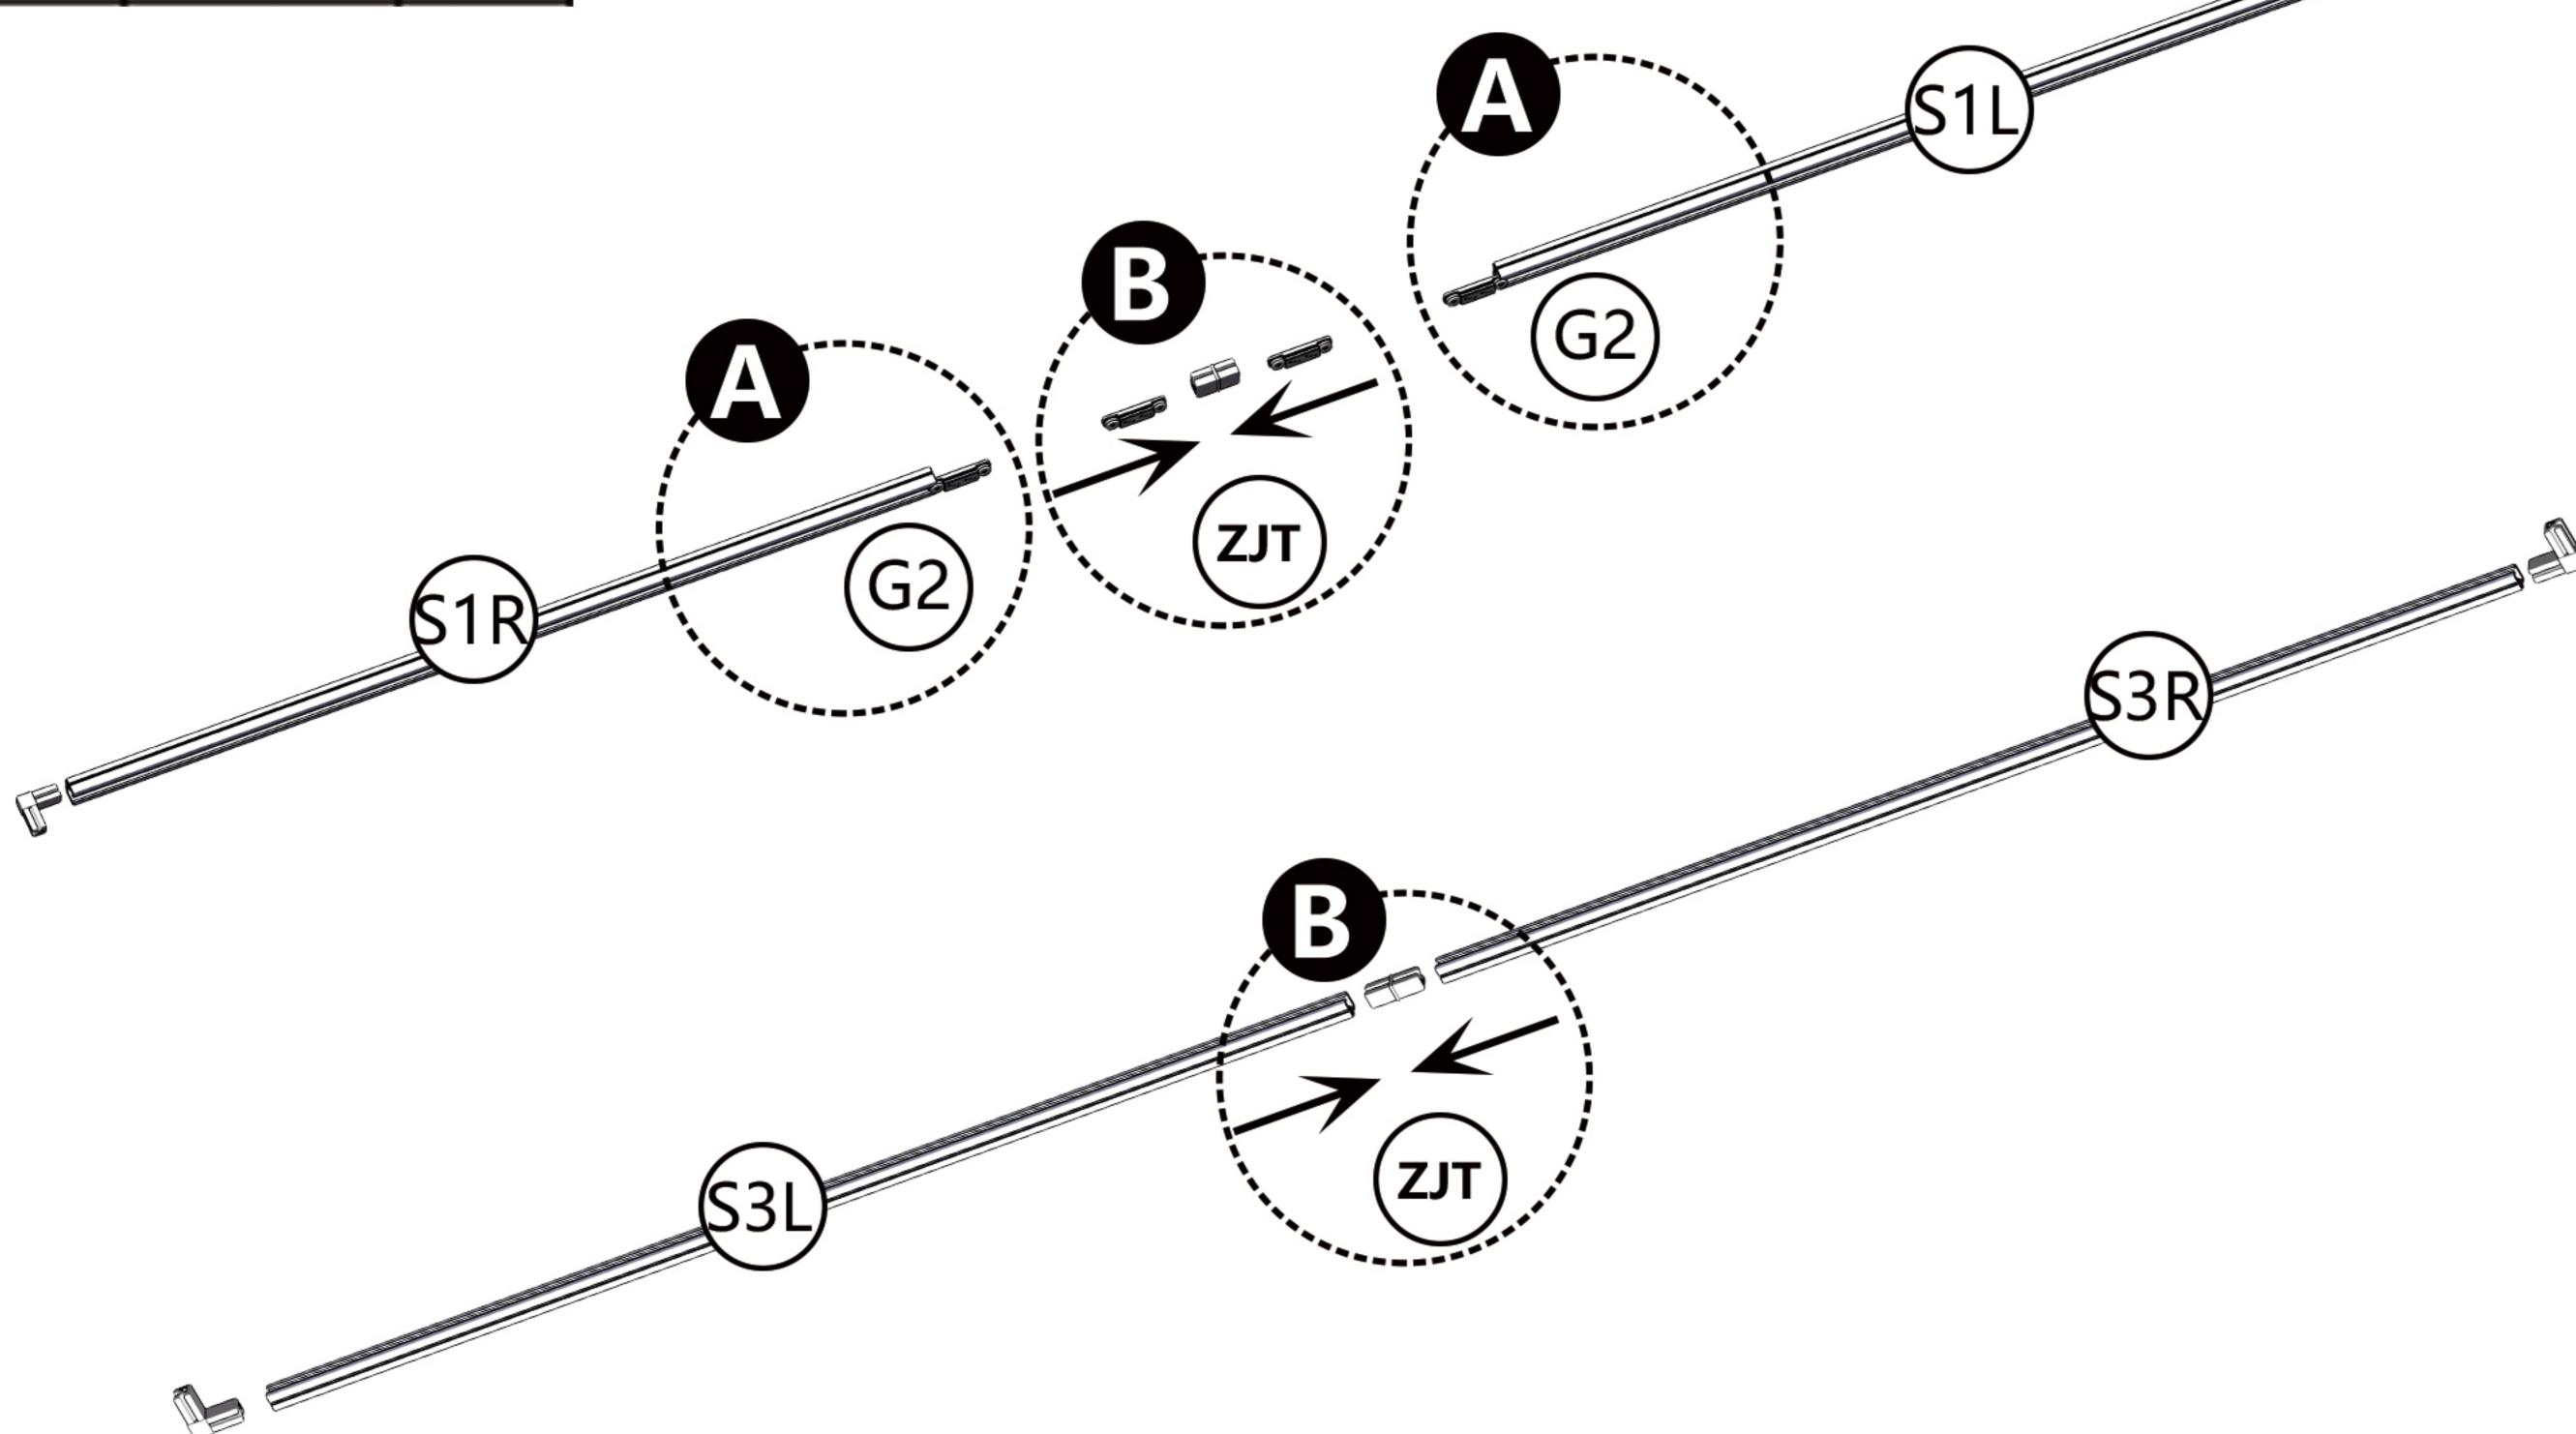

## Notice:

In this step, only the three holes in the middle of Q2 need to be installed and reserved on both sides. The reserved holes are shared with the following steps.

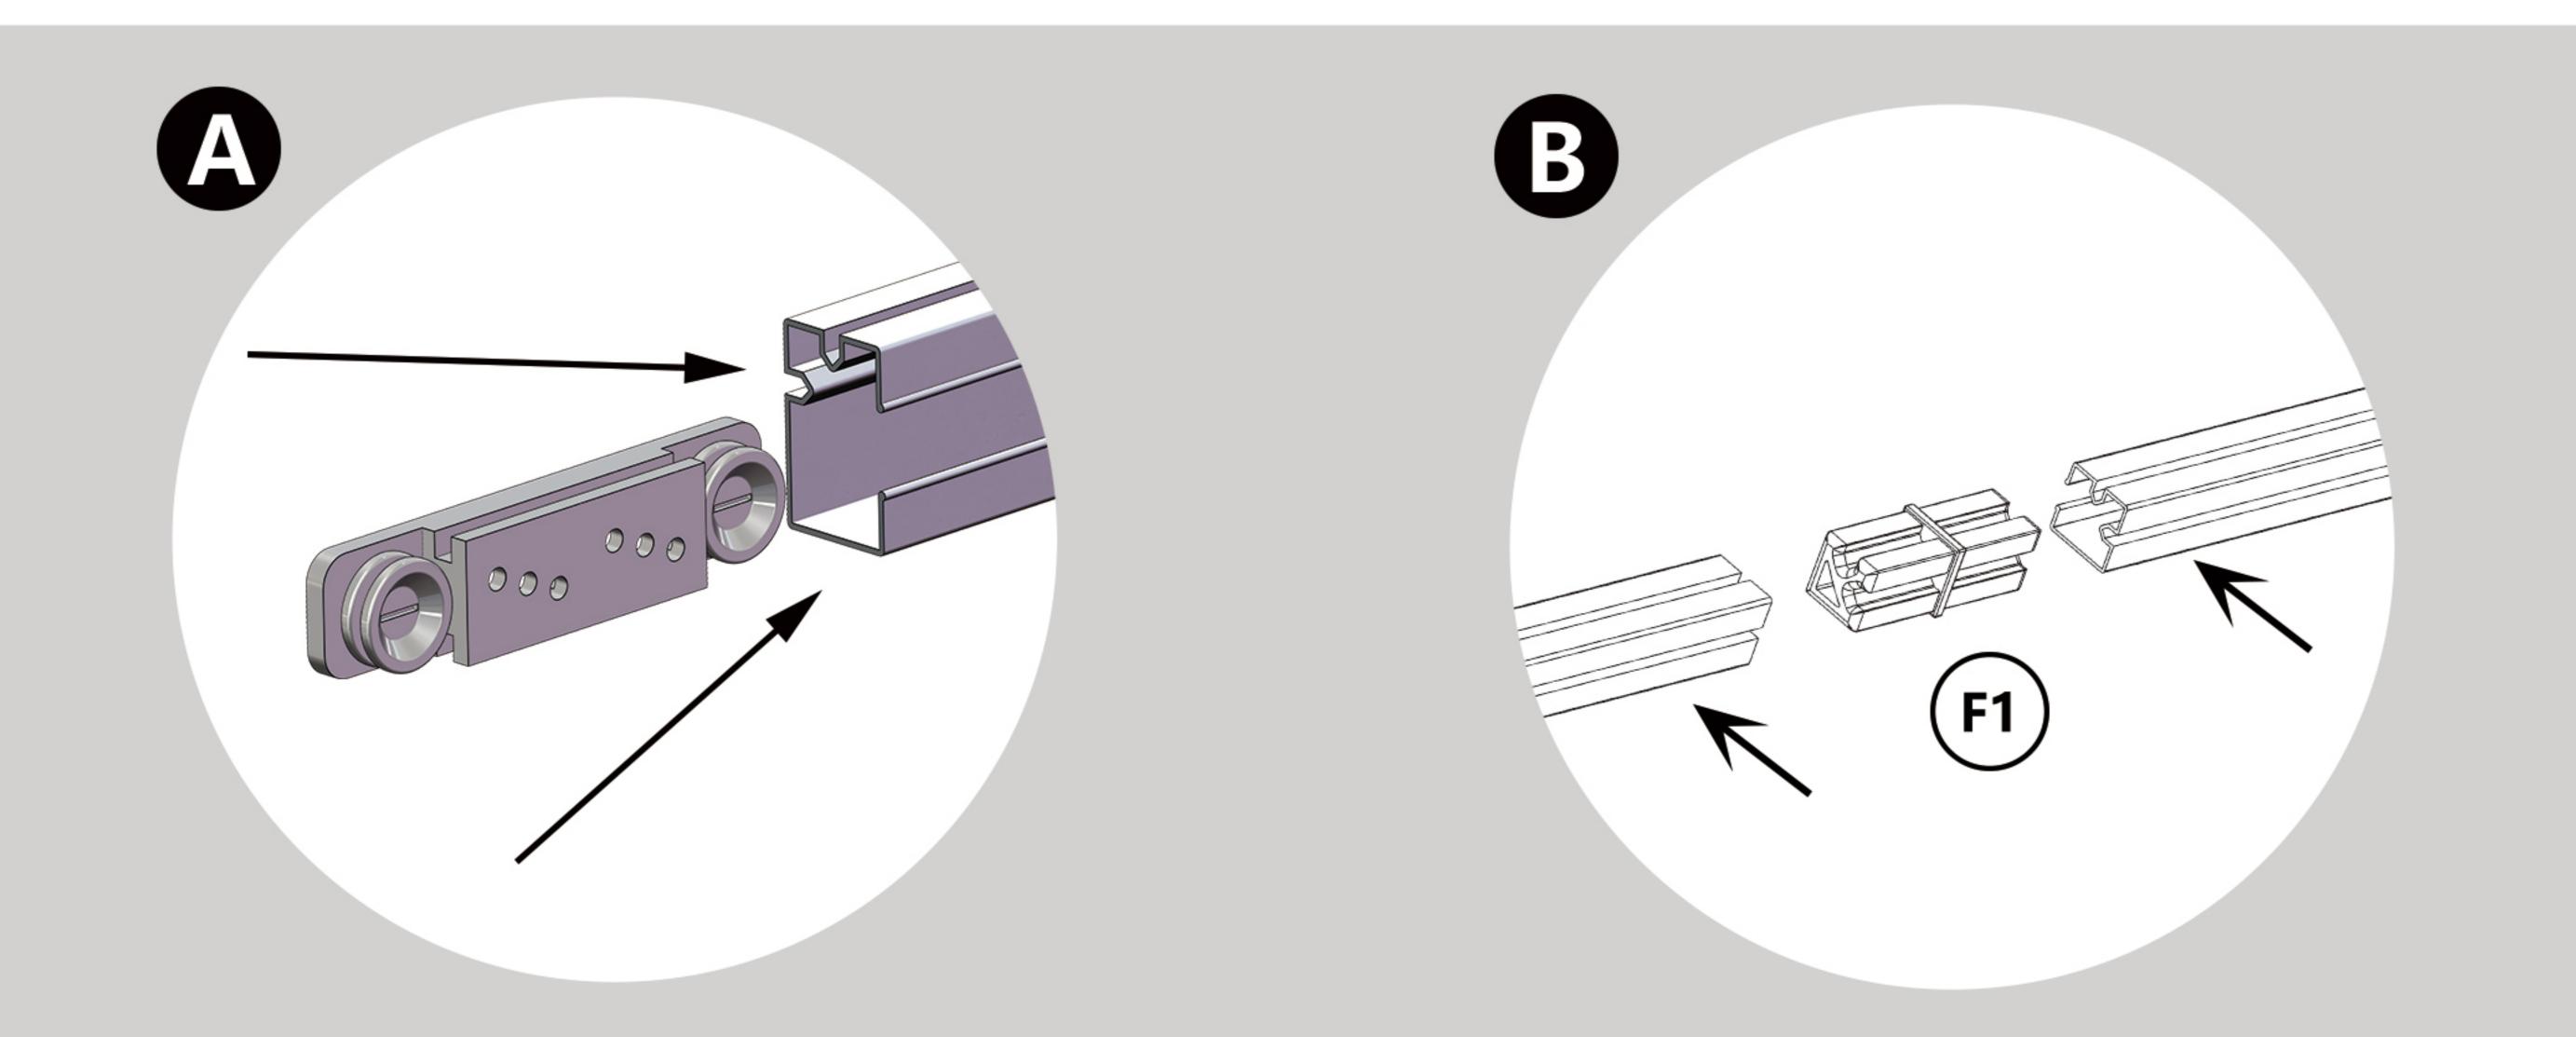

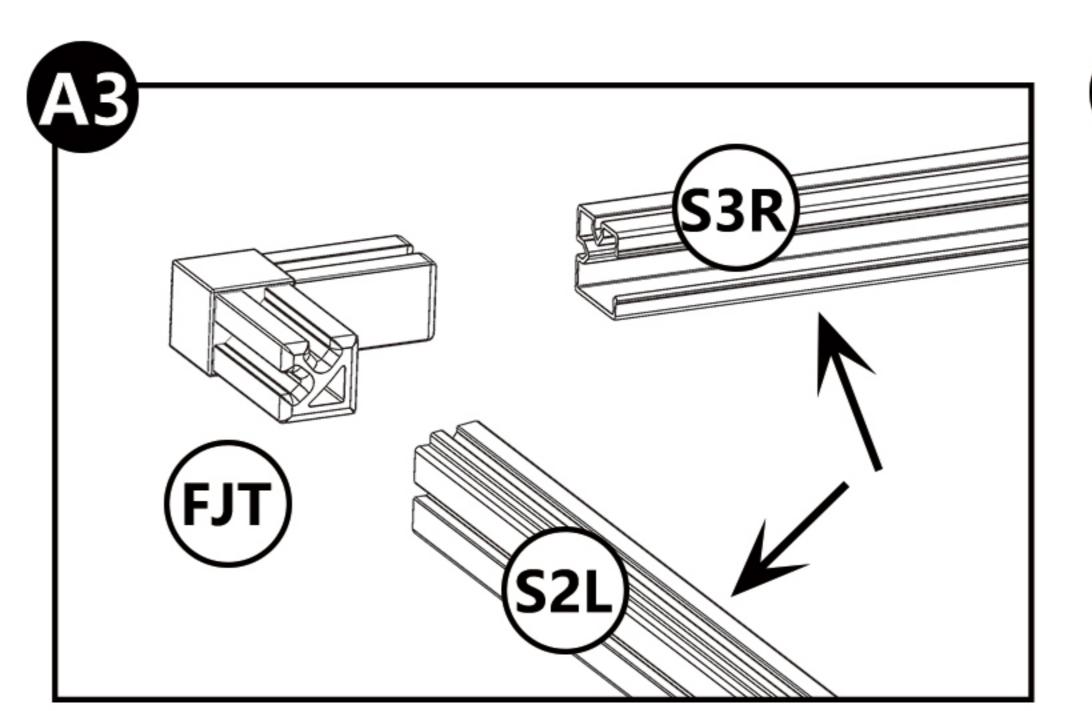

G2 has been placed in S1R and S1L before shipment. If it slides out, follow step A to insert it. S1L and S1R, S3L and S3R, are connected by ZJT and fixed by F1, respectively.

#### Notice:

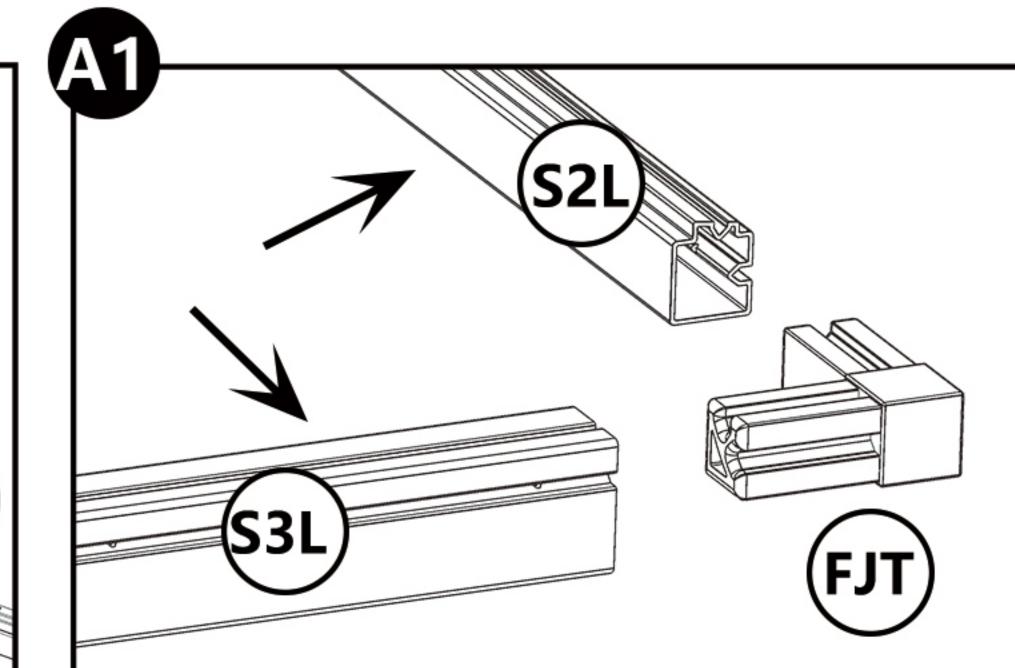

ZJT installation: At the junction of two arrows, please install in the direction indicated by the arrows ( $\rightarrow\leftarrow$ ). FJT installation: Connect the two-layer frame to the DGT as shown.

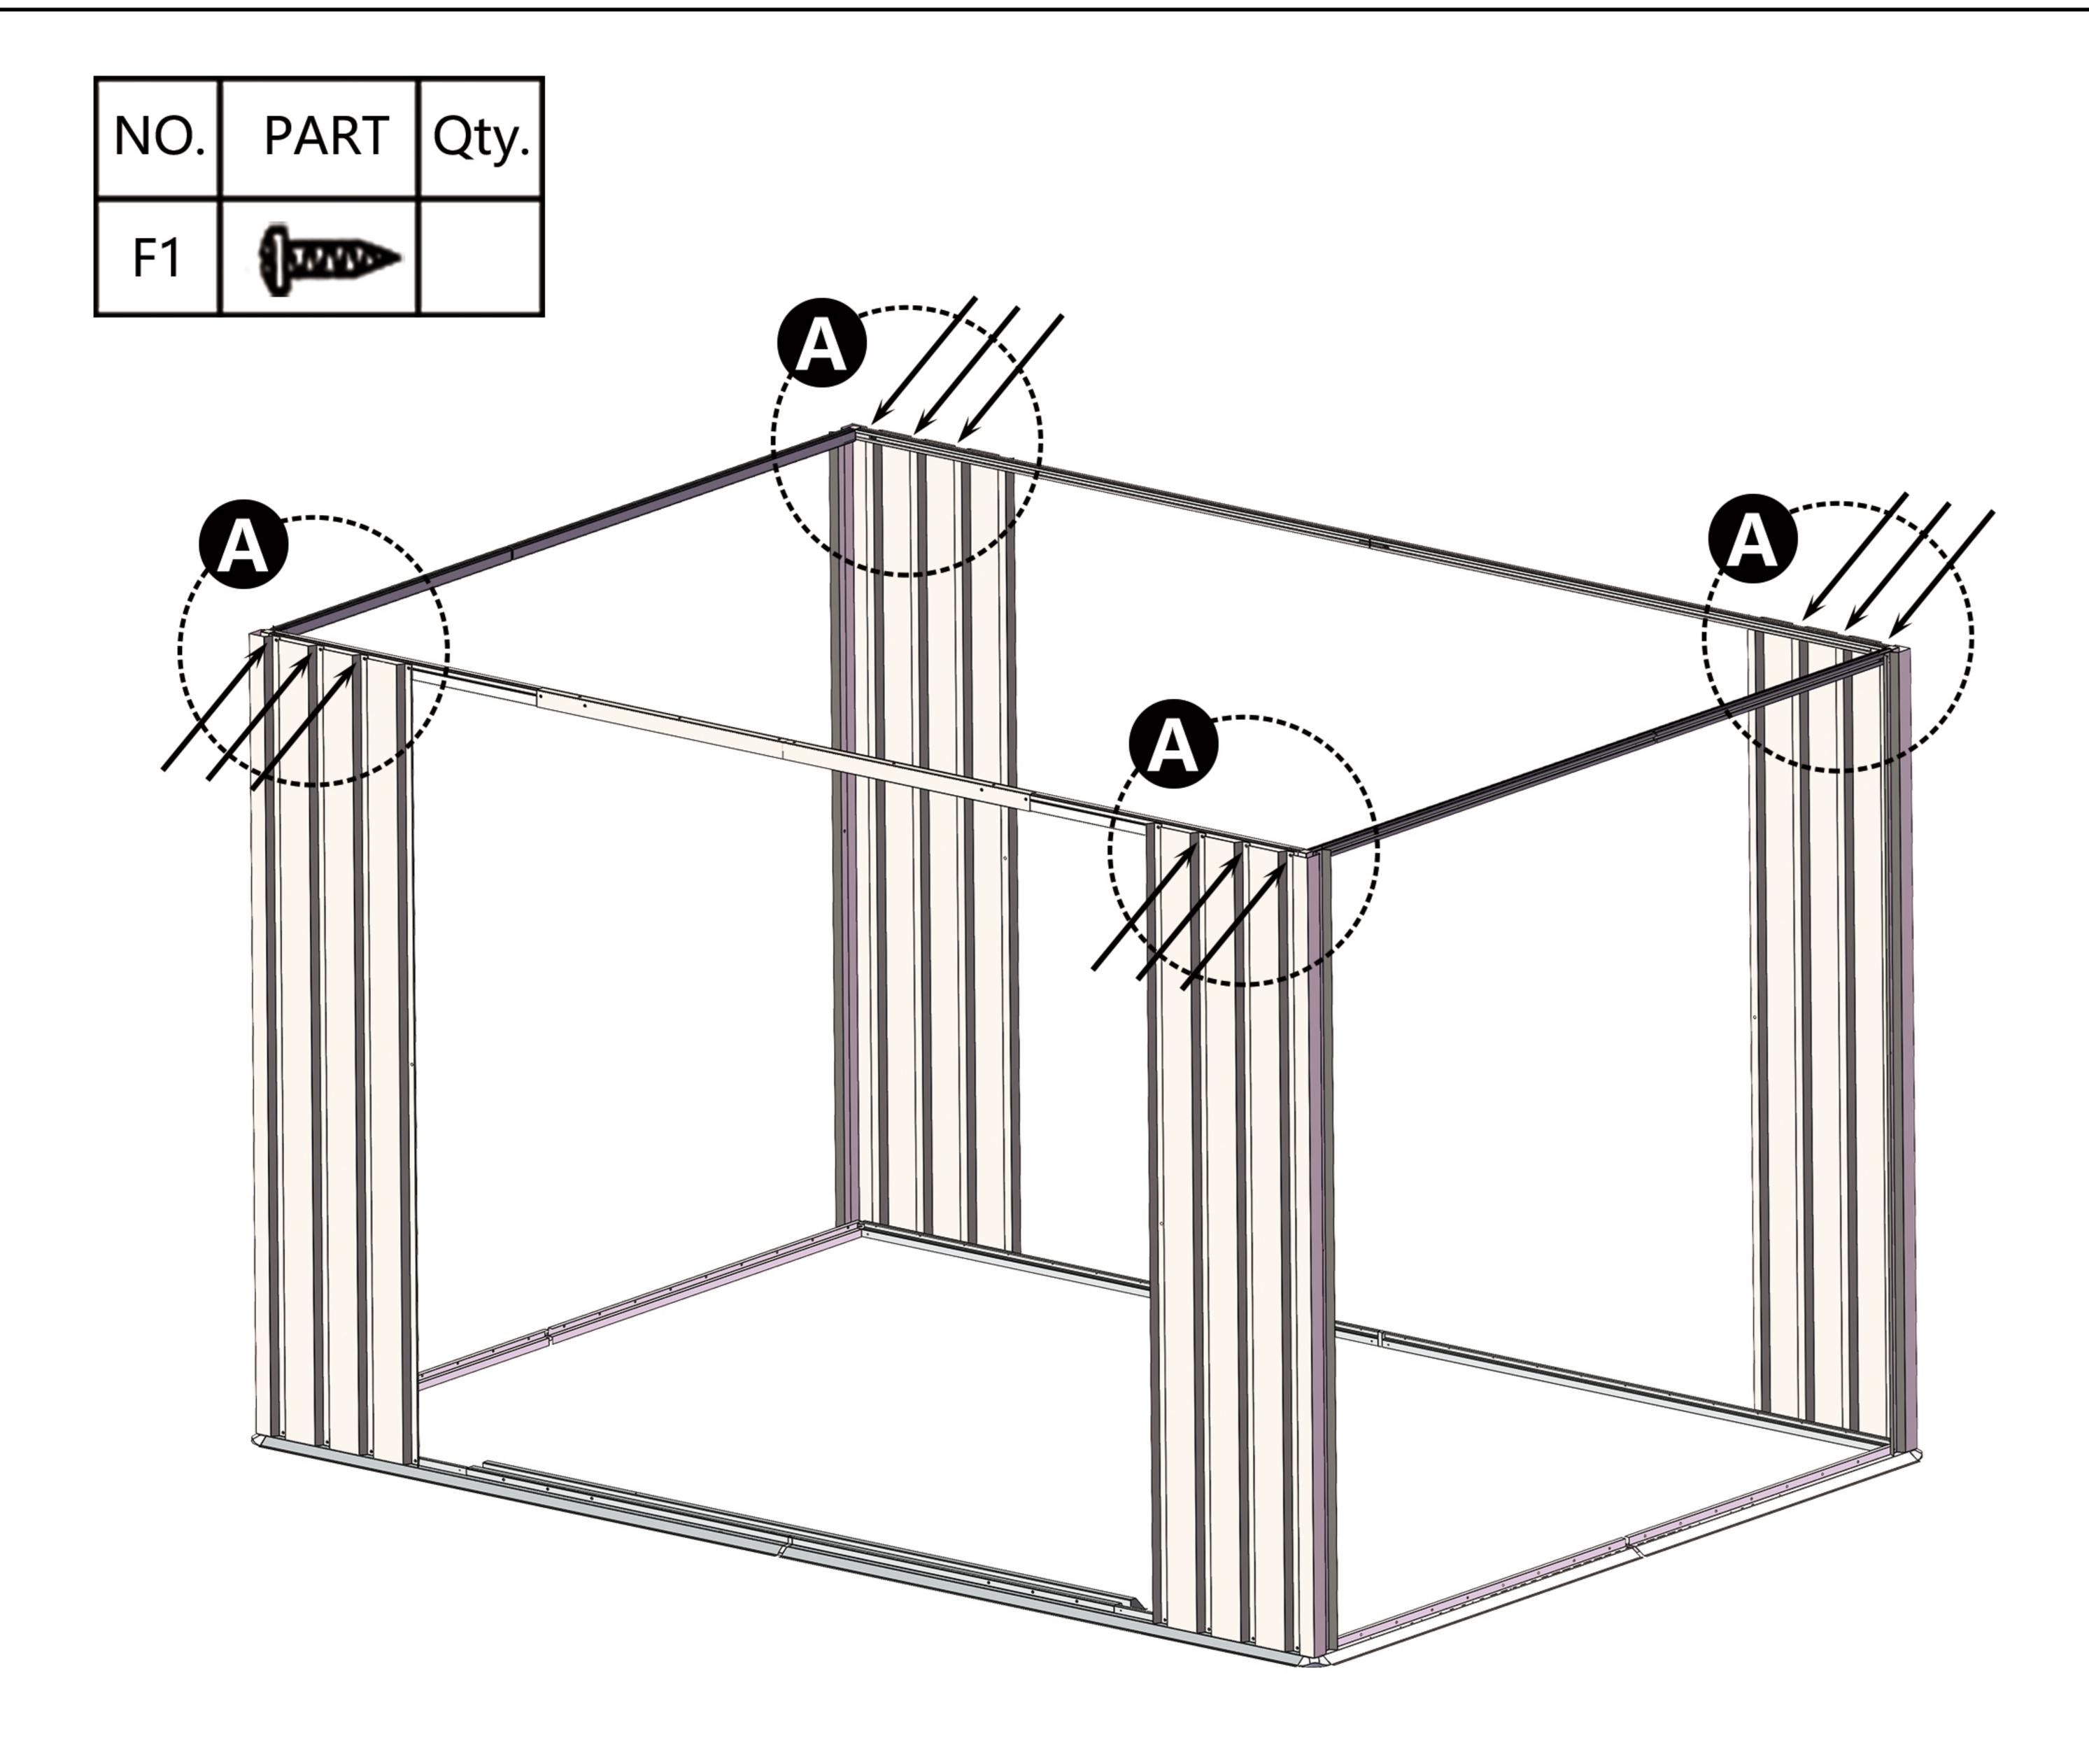

Each DGT needs to be fixed with two F1s. S1 has no fixed hole position

N1 mounting: Install the N1 on the connected S1R and S1L, securing it from the bottom up with 2 F1s.

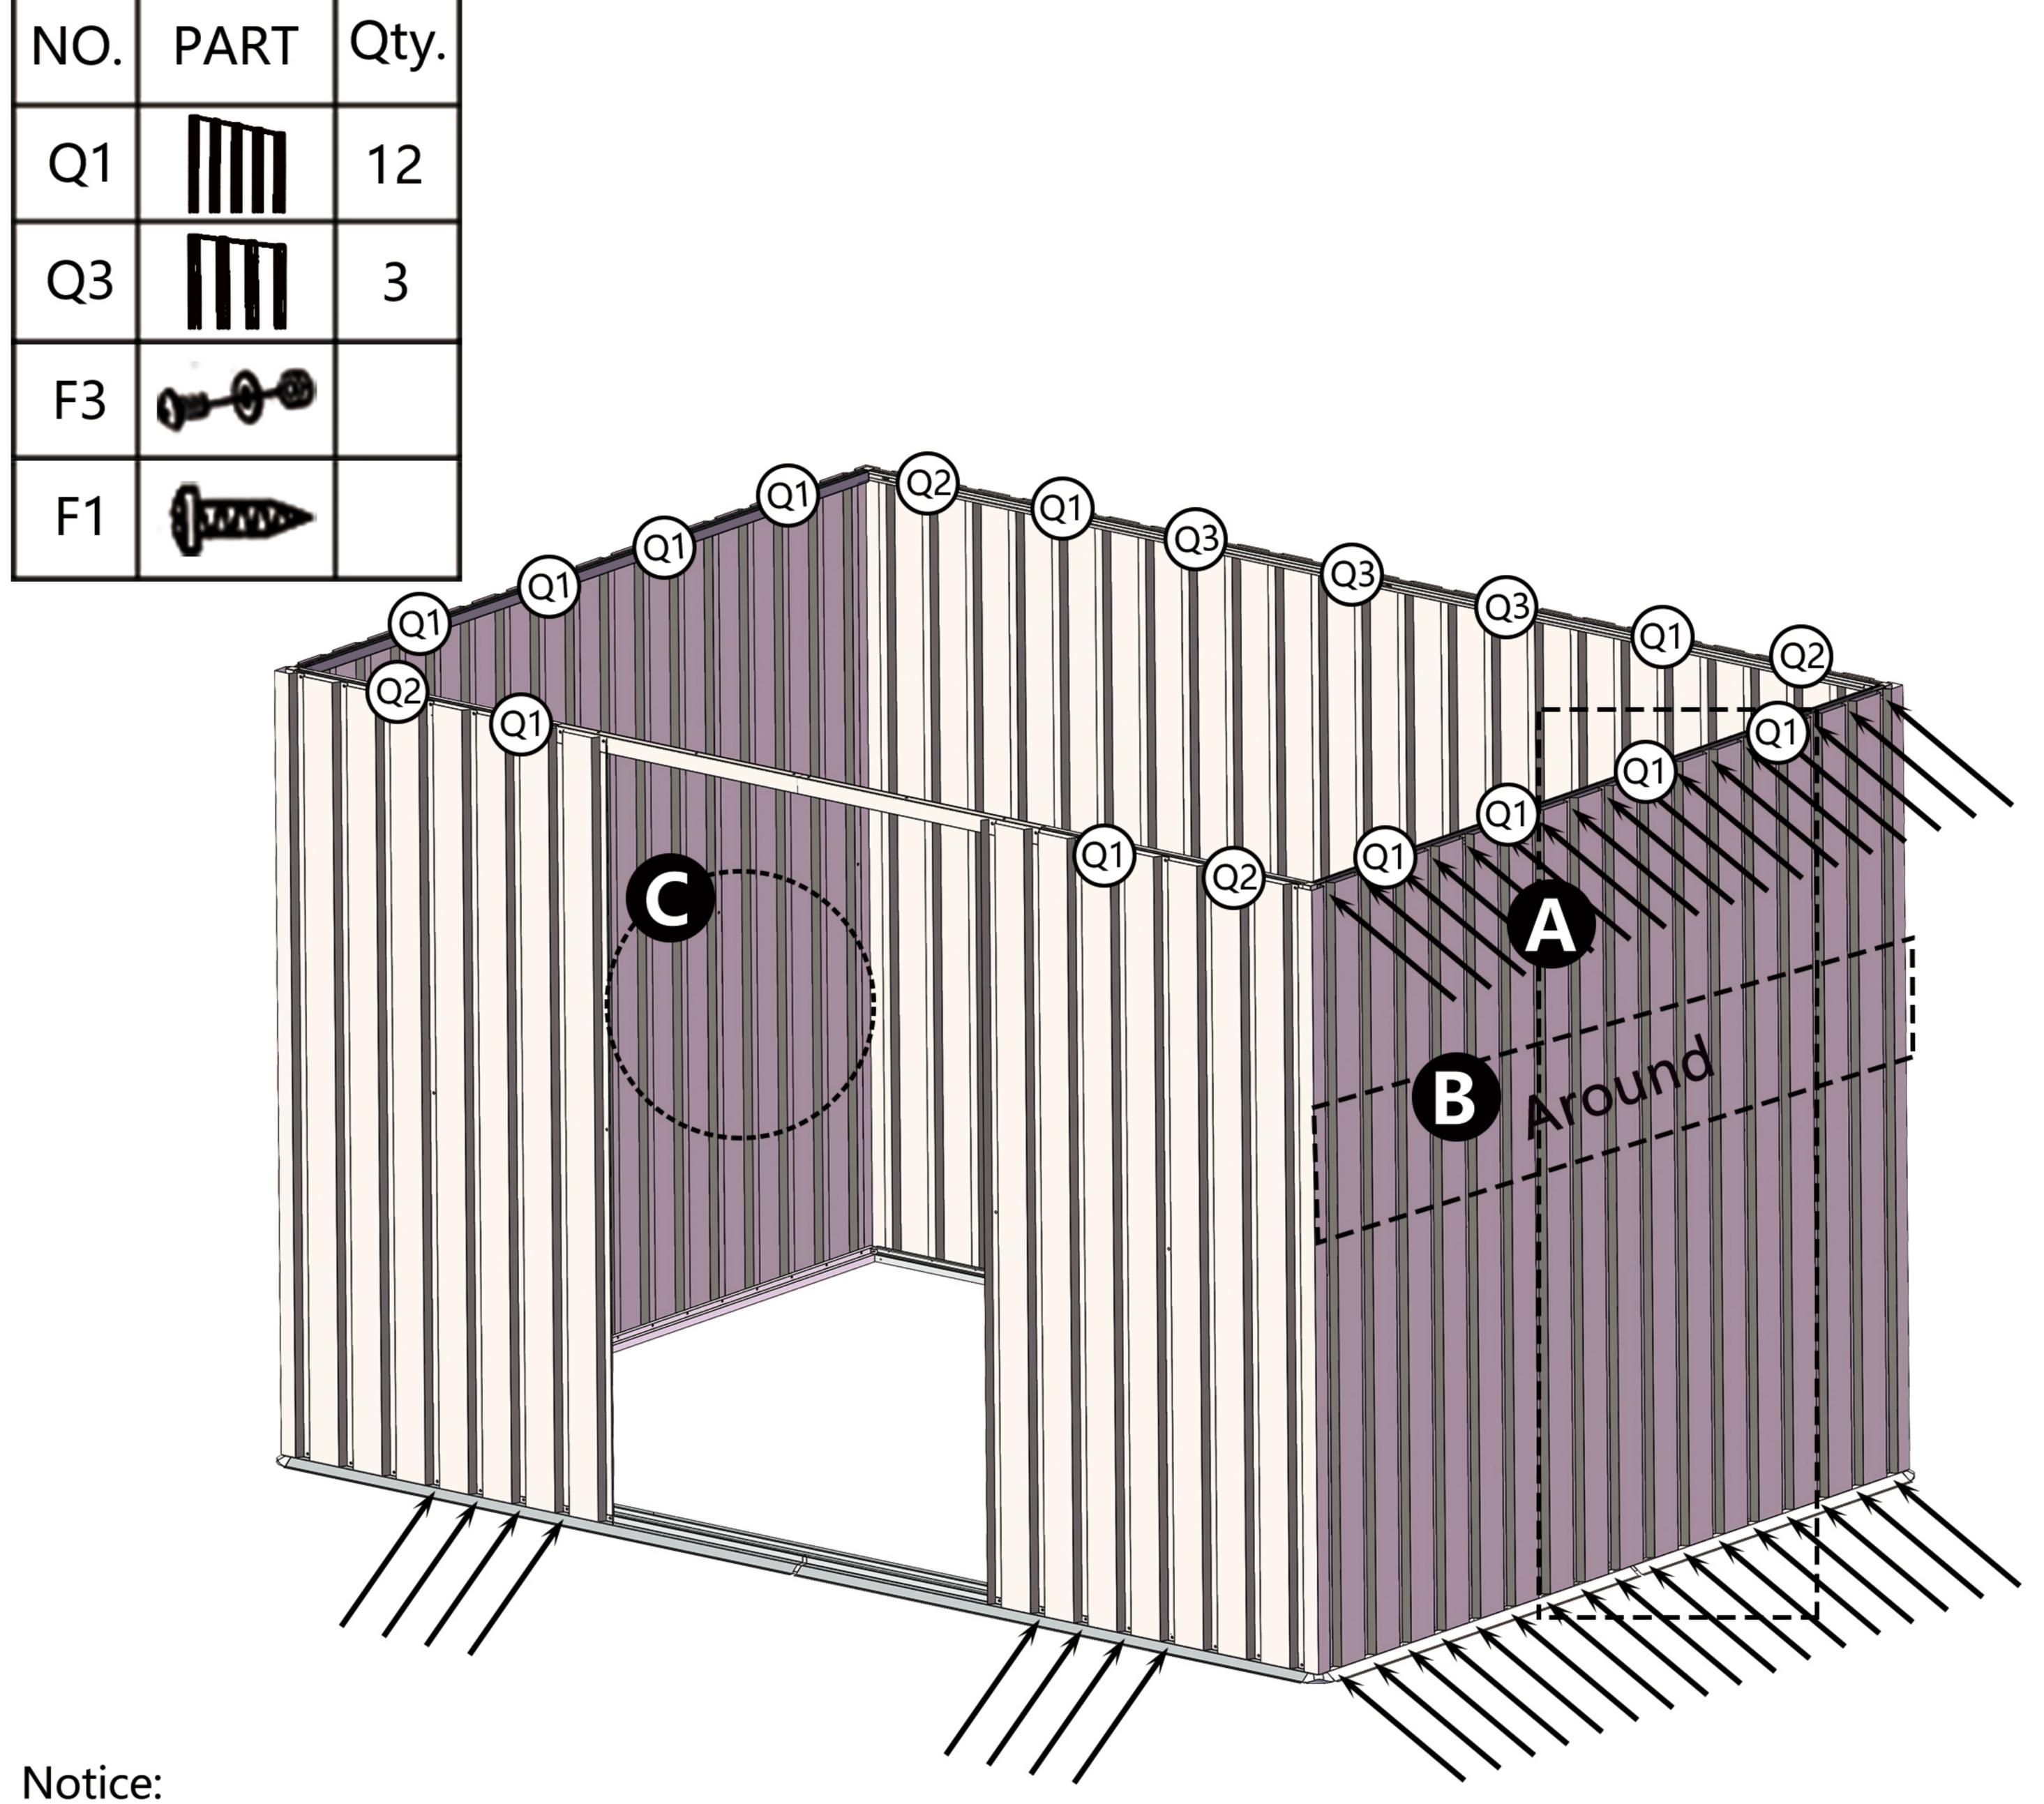

In this step, only the middle three holes need to be installed, and both sides need to be reserved.

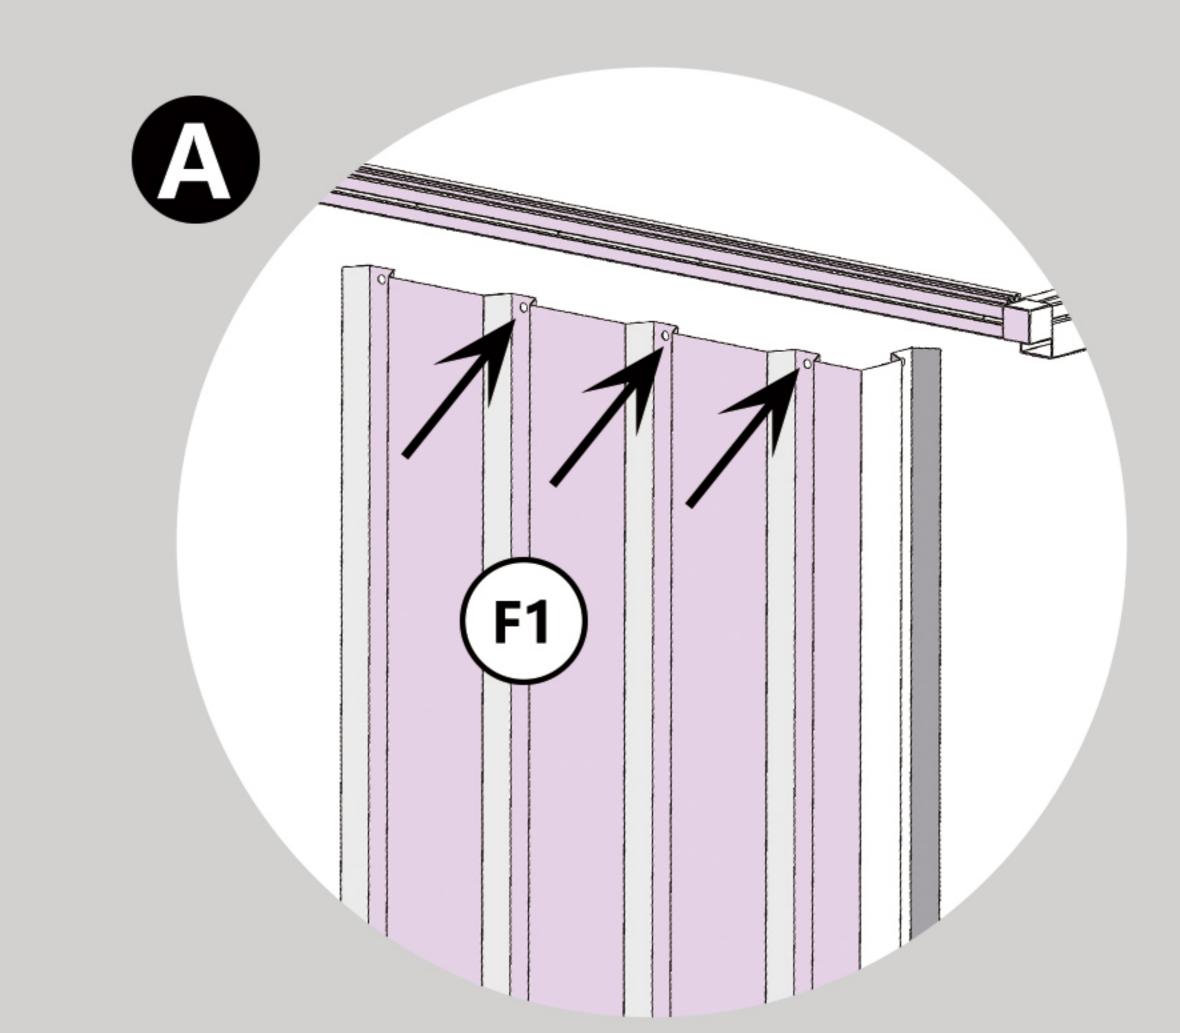

The reserved hole is shared with other steps.

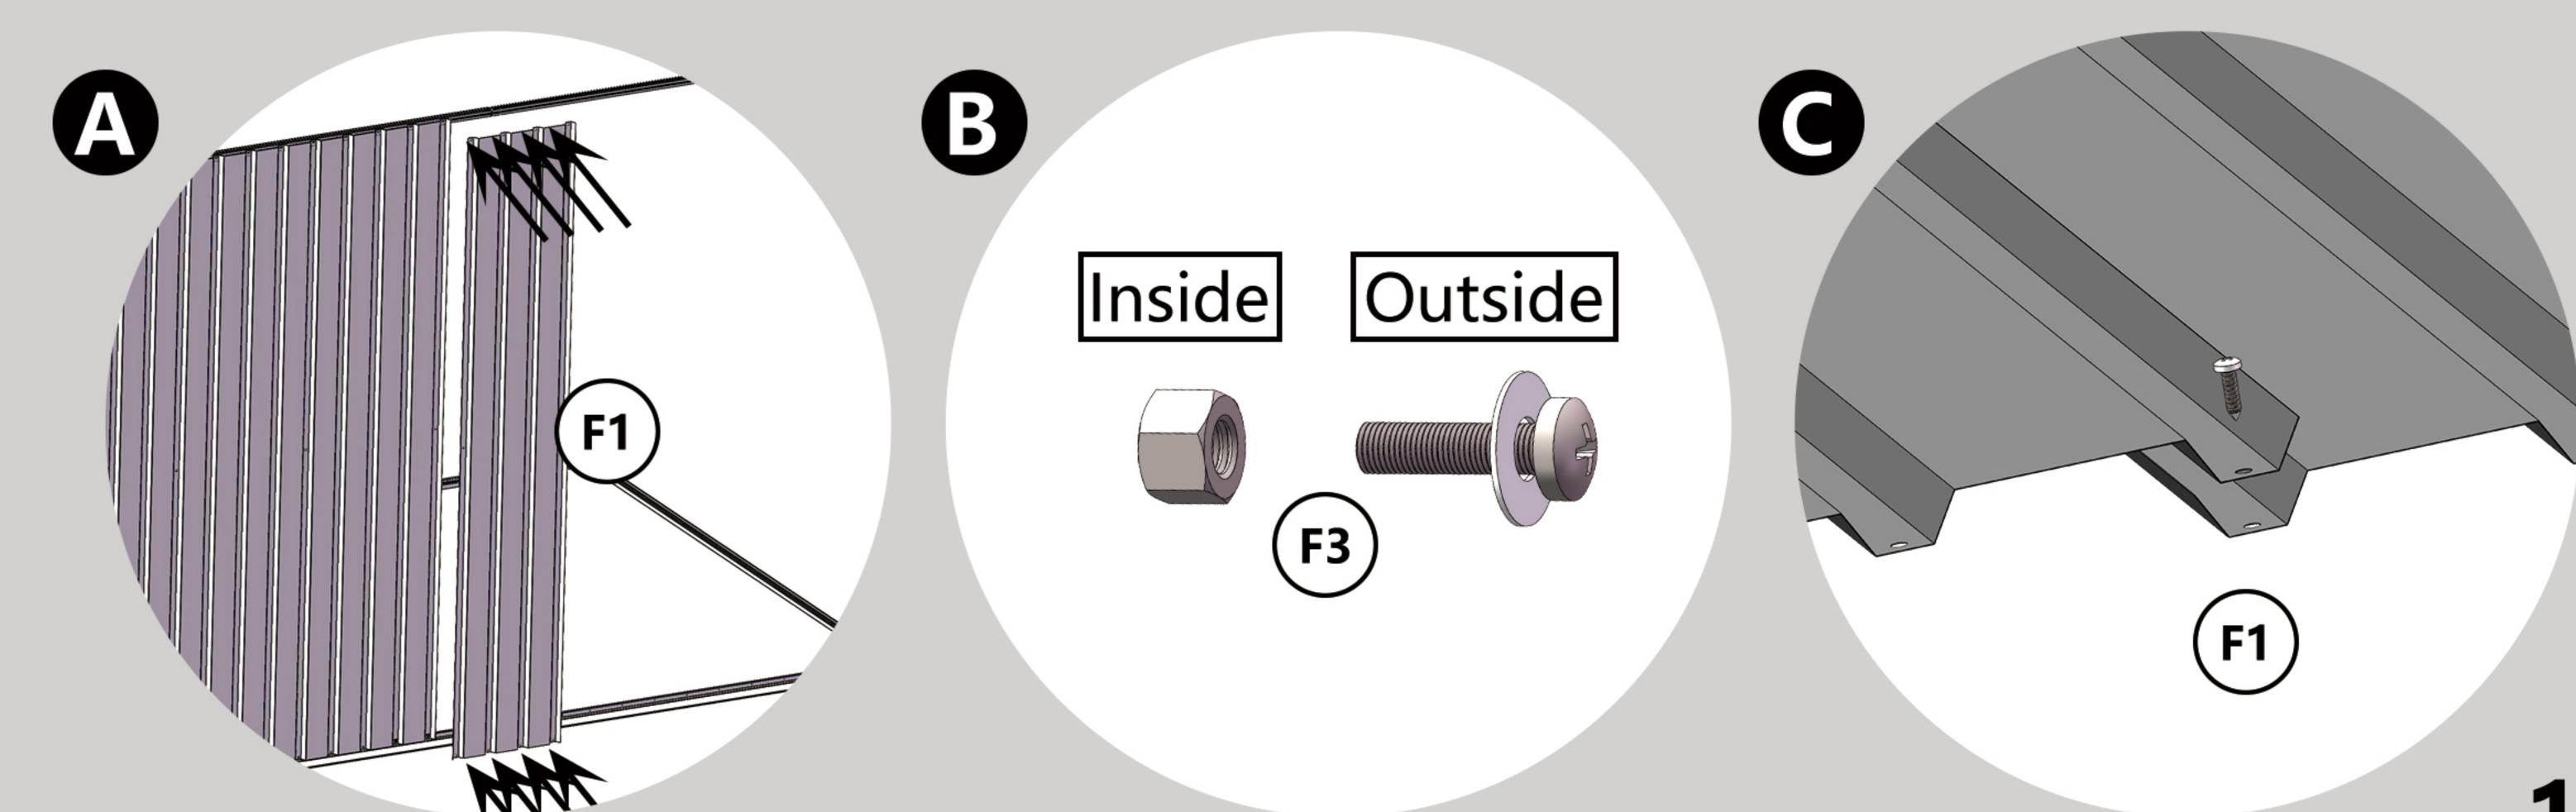

The walls are tiled on the outside and framed on the inside

As shown in the picture, assemble the wall tiles in turn, Q1\Q3,The top, middle and bottom of the wall tiles need to be screwed,

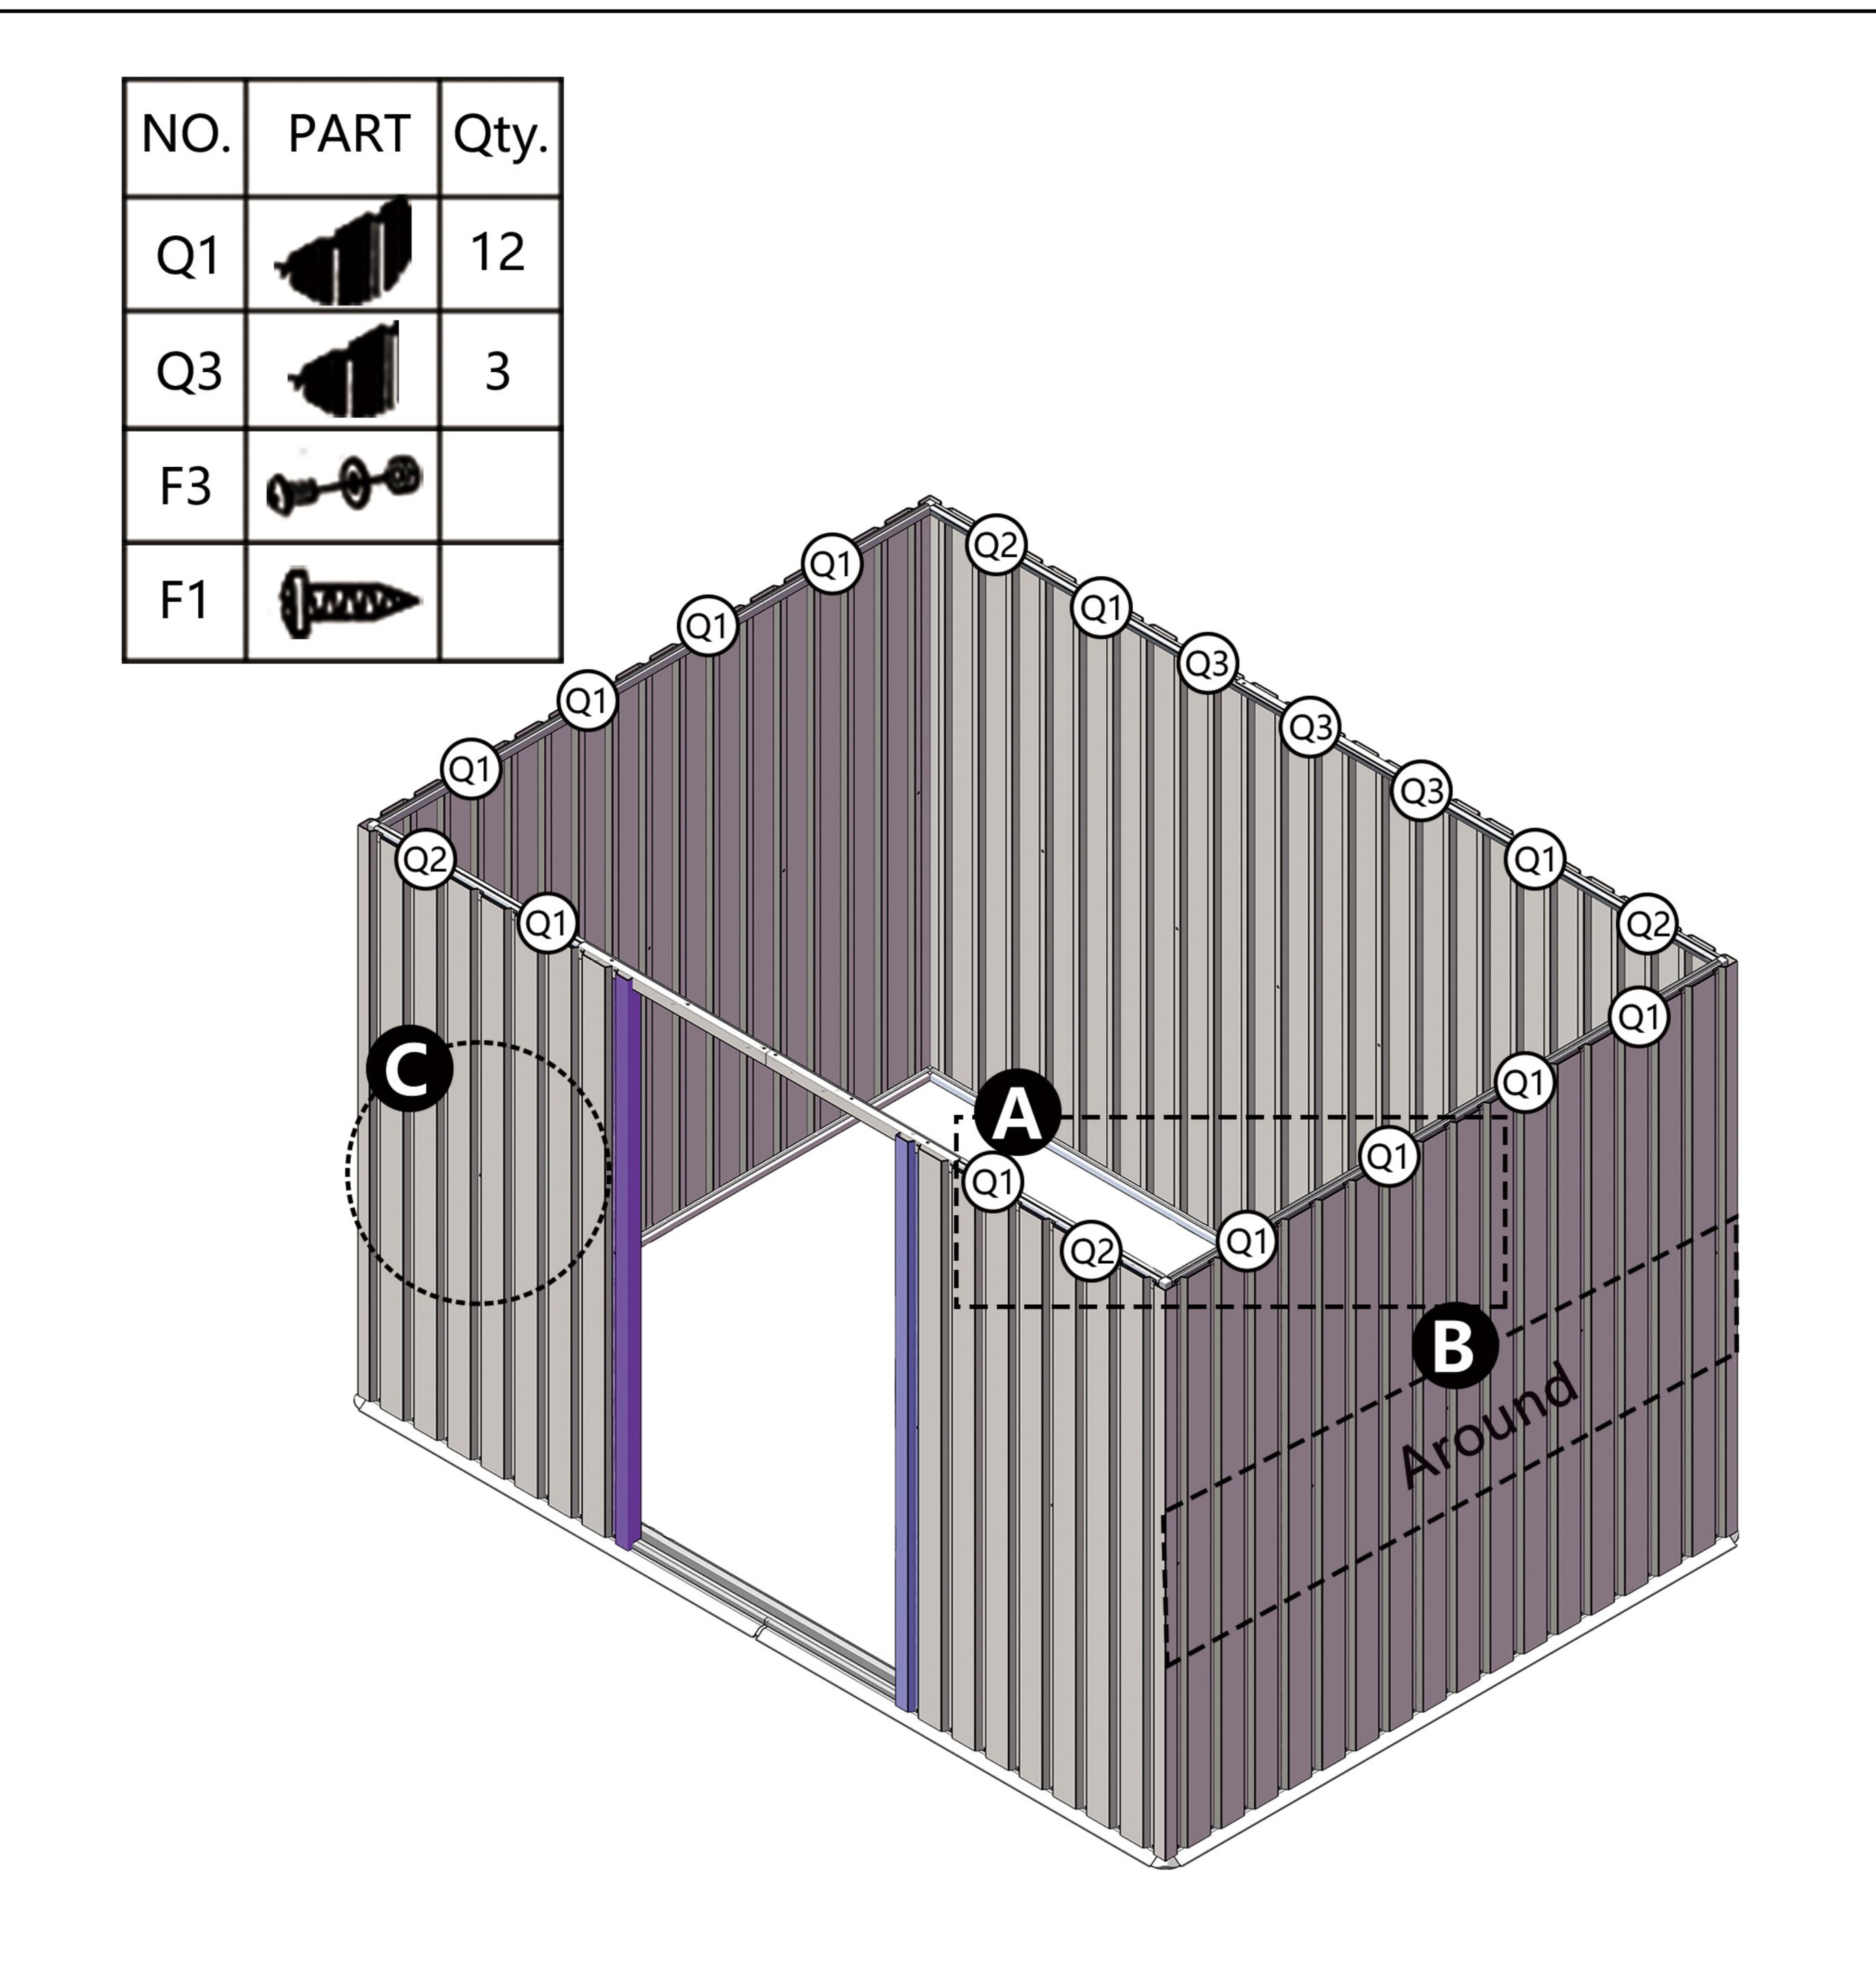

The upper and lower ends are fixed with F1, and the middle is fixed with F3.

Connect C with 2 B1, L1L, L1R, B3L and B3R and fix them with F3;

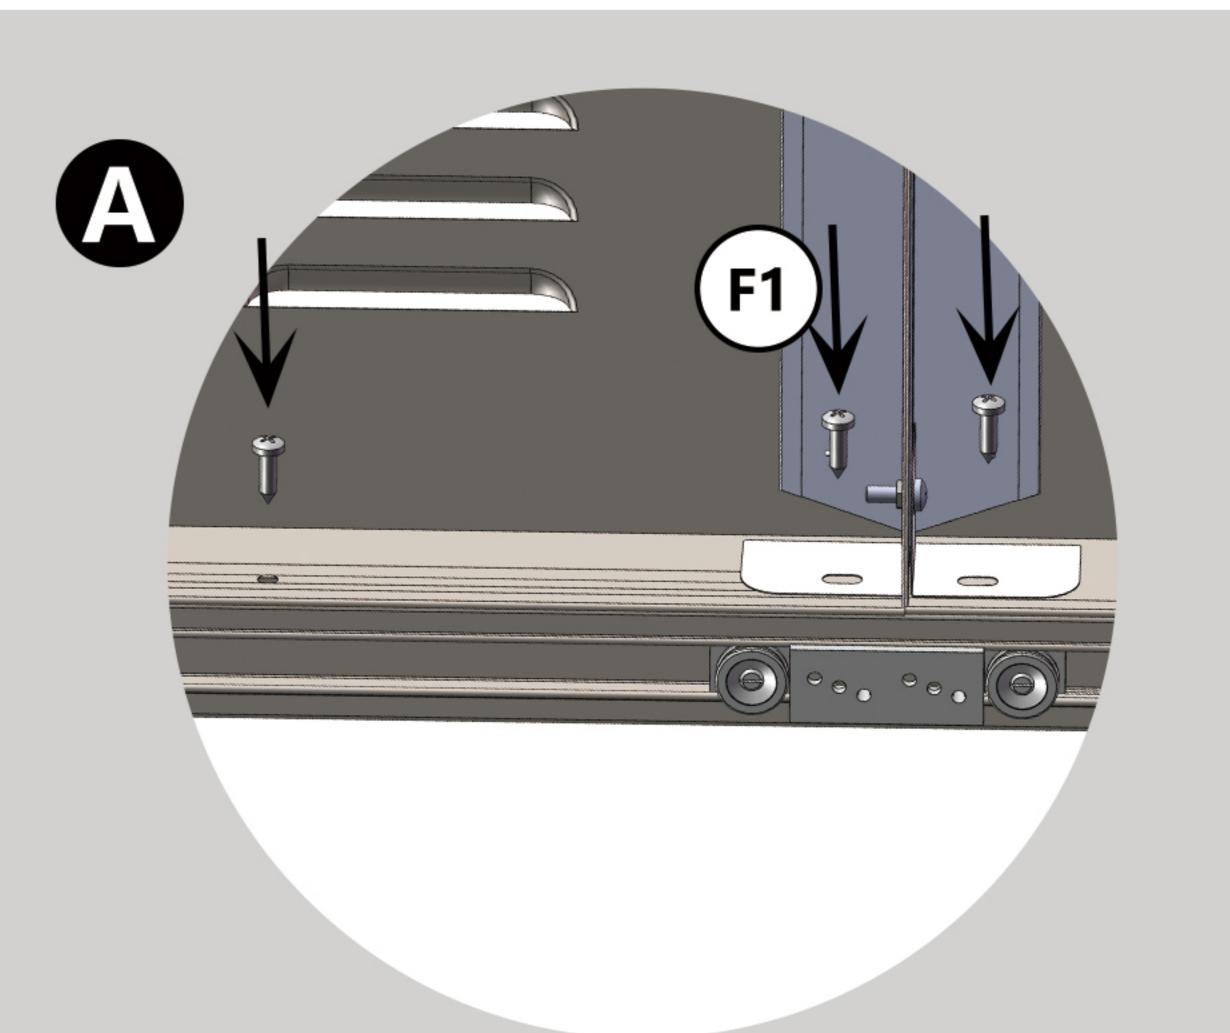

After completing step A, bend the other end of C about 45° and connect it to the bottom of L3

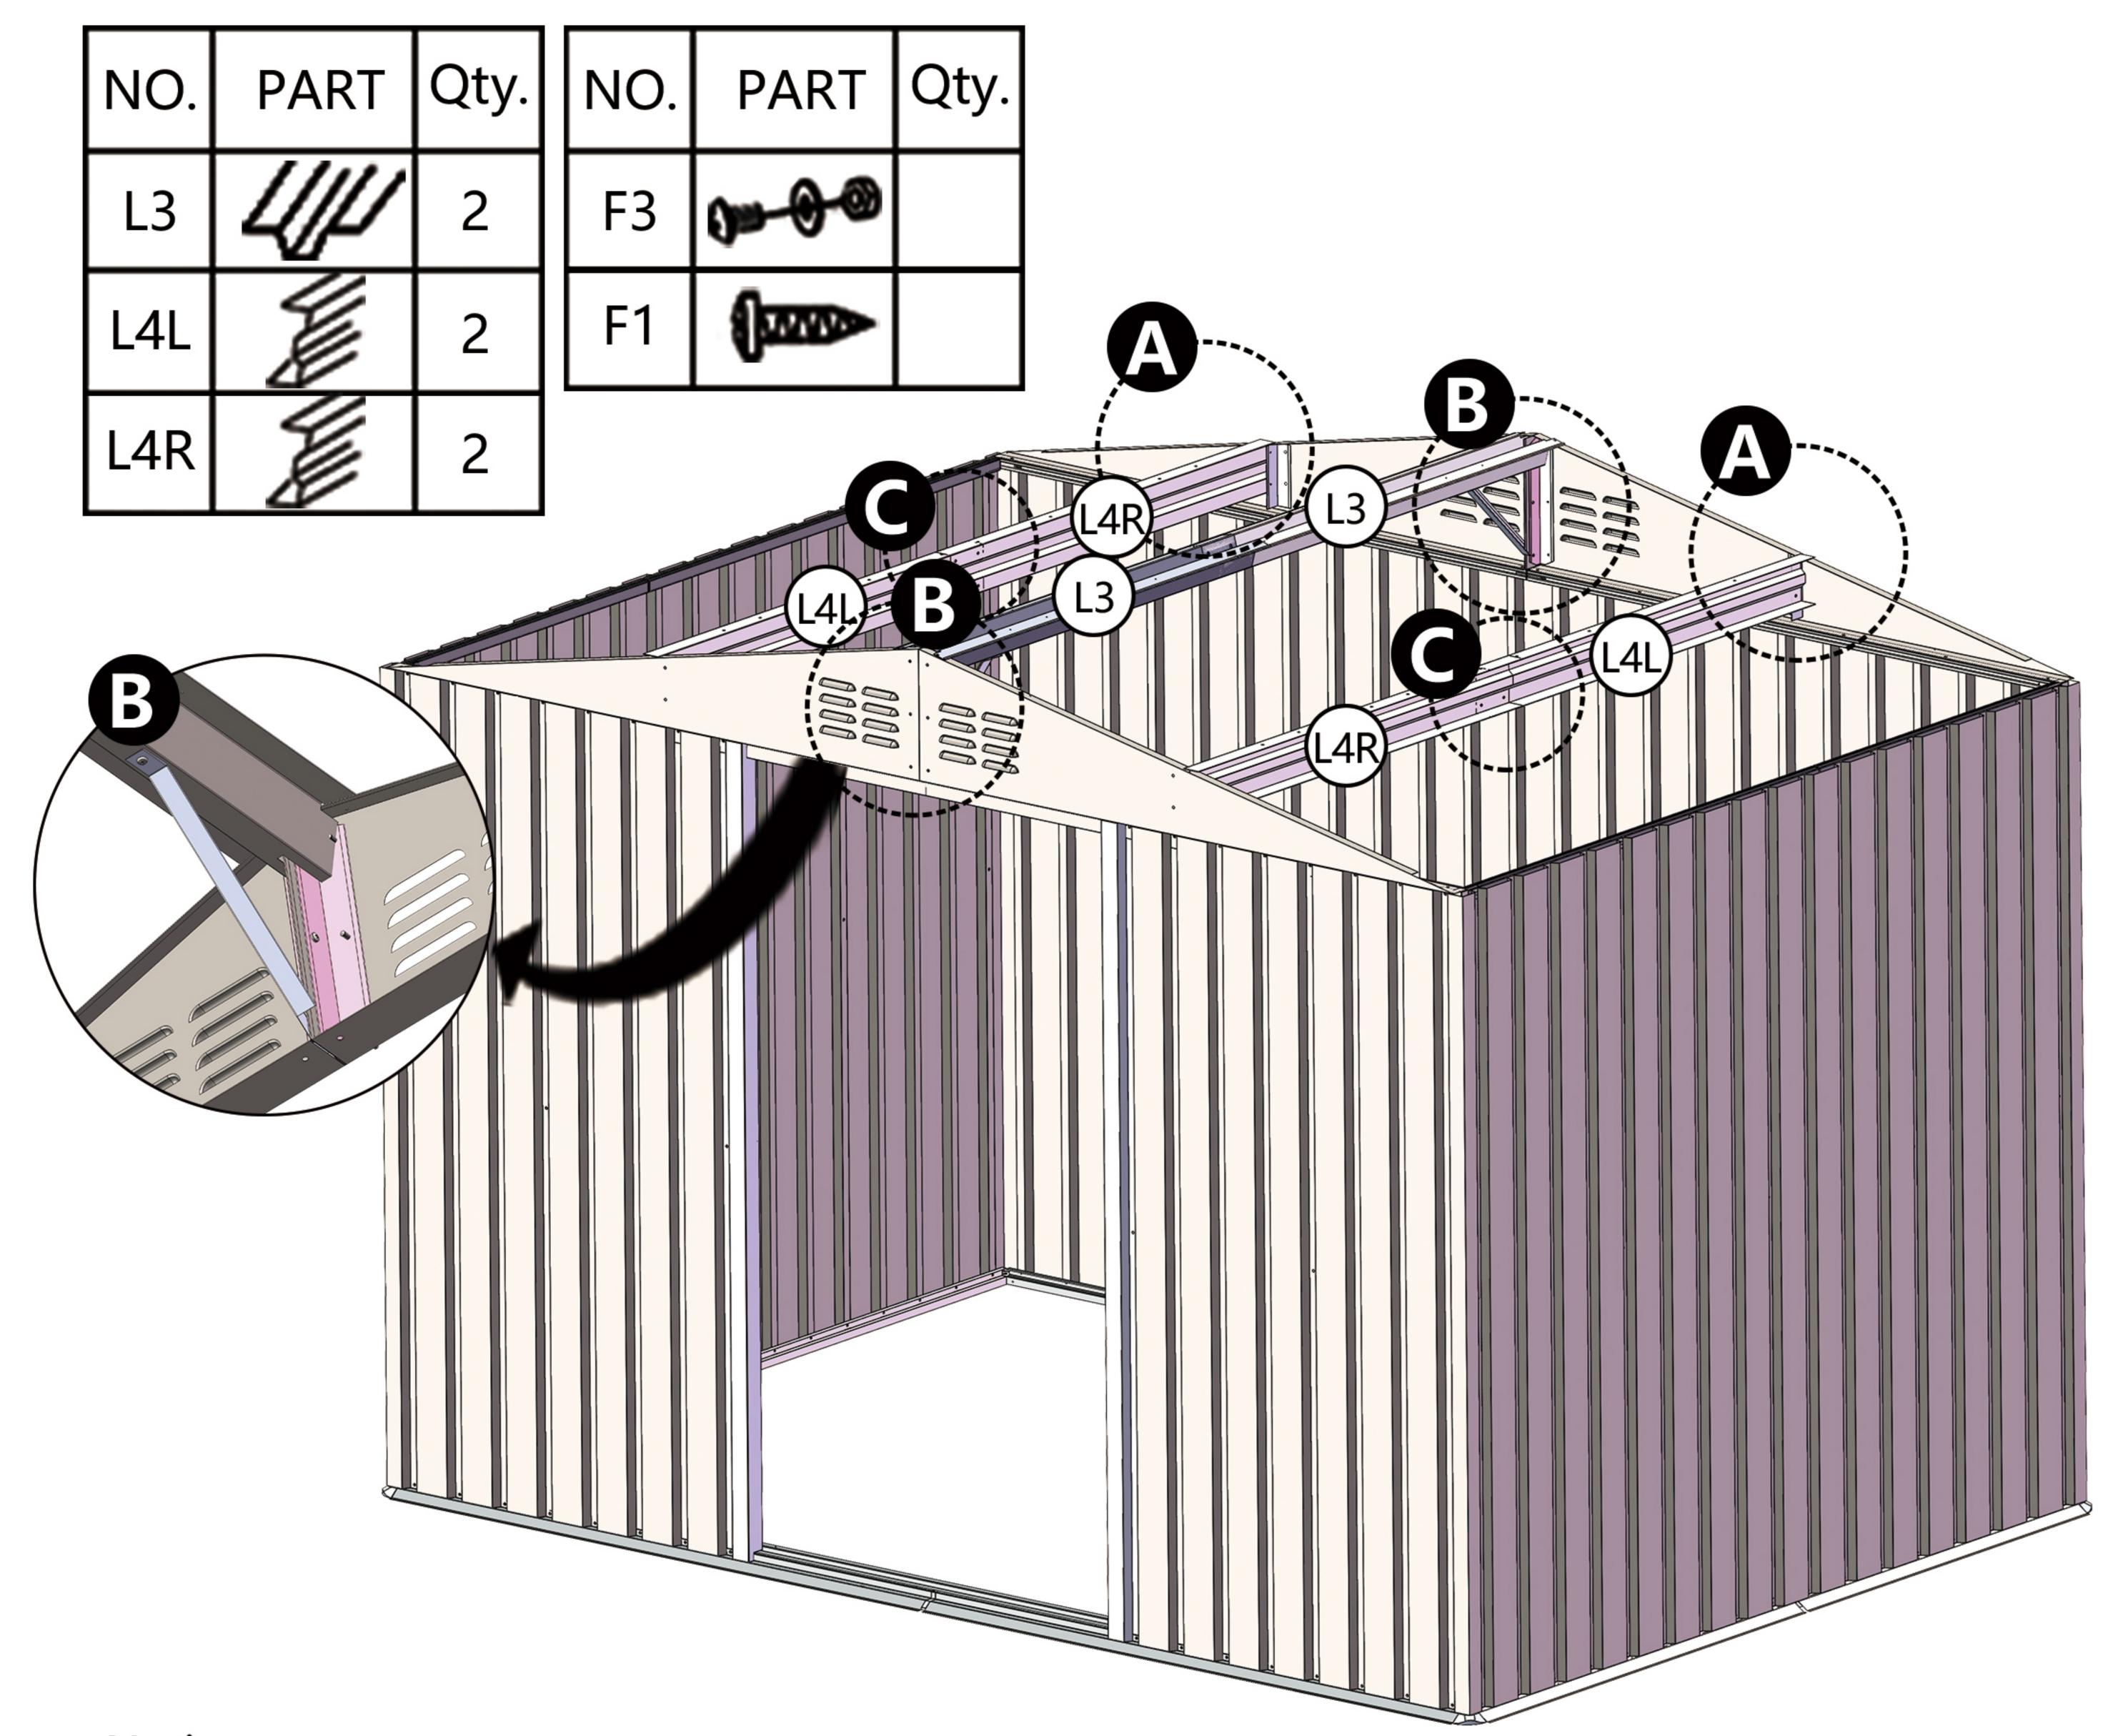

## Notice:

The assembled roof support parts are successively installed on the wall tiles with F1

Step A: Insert the connected L4R and L4L into the B2L and B2R holes respectively.

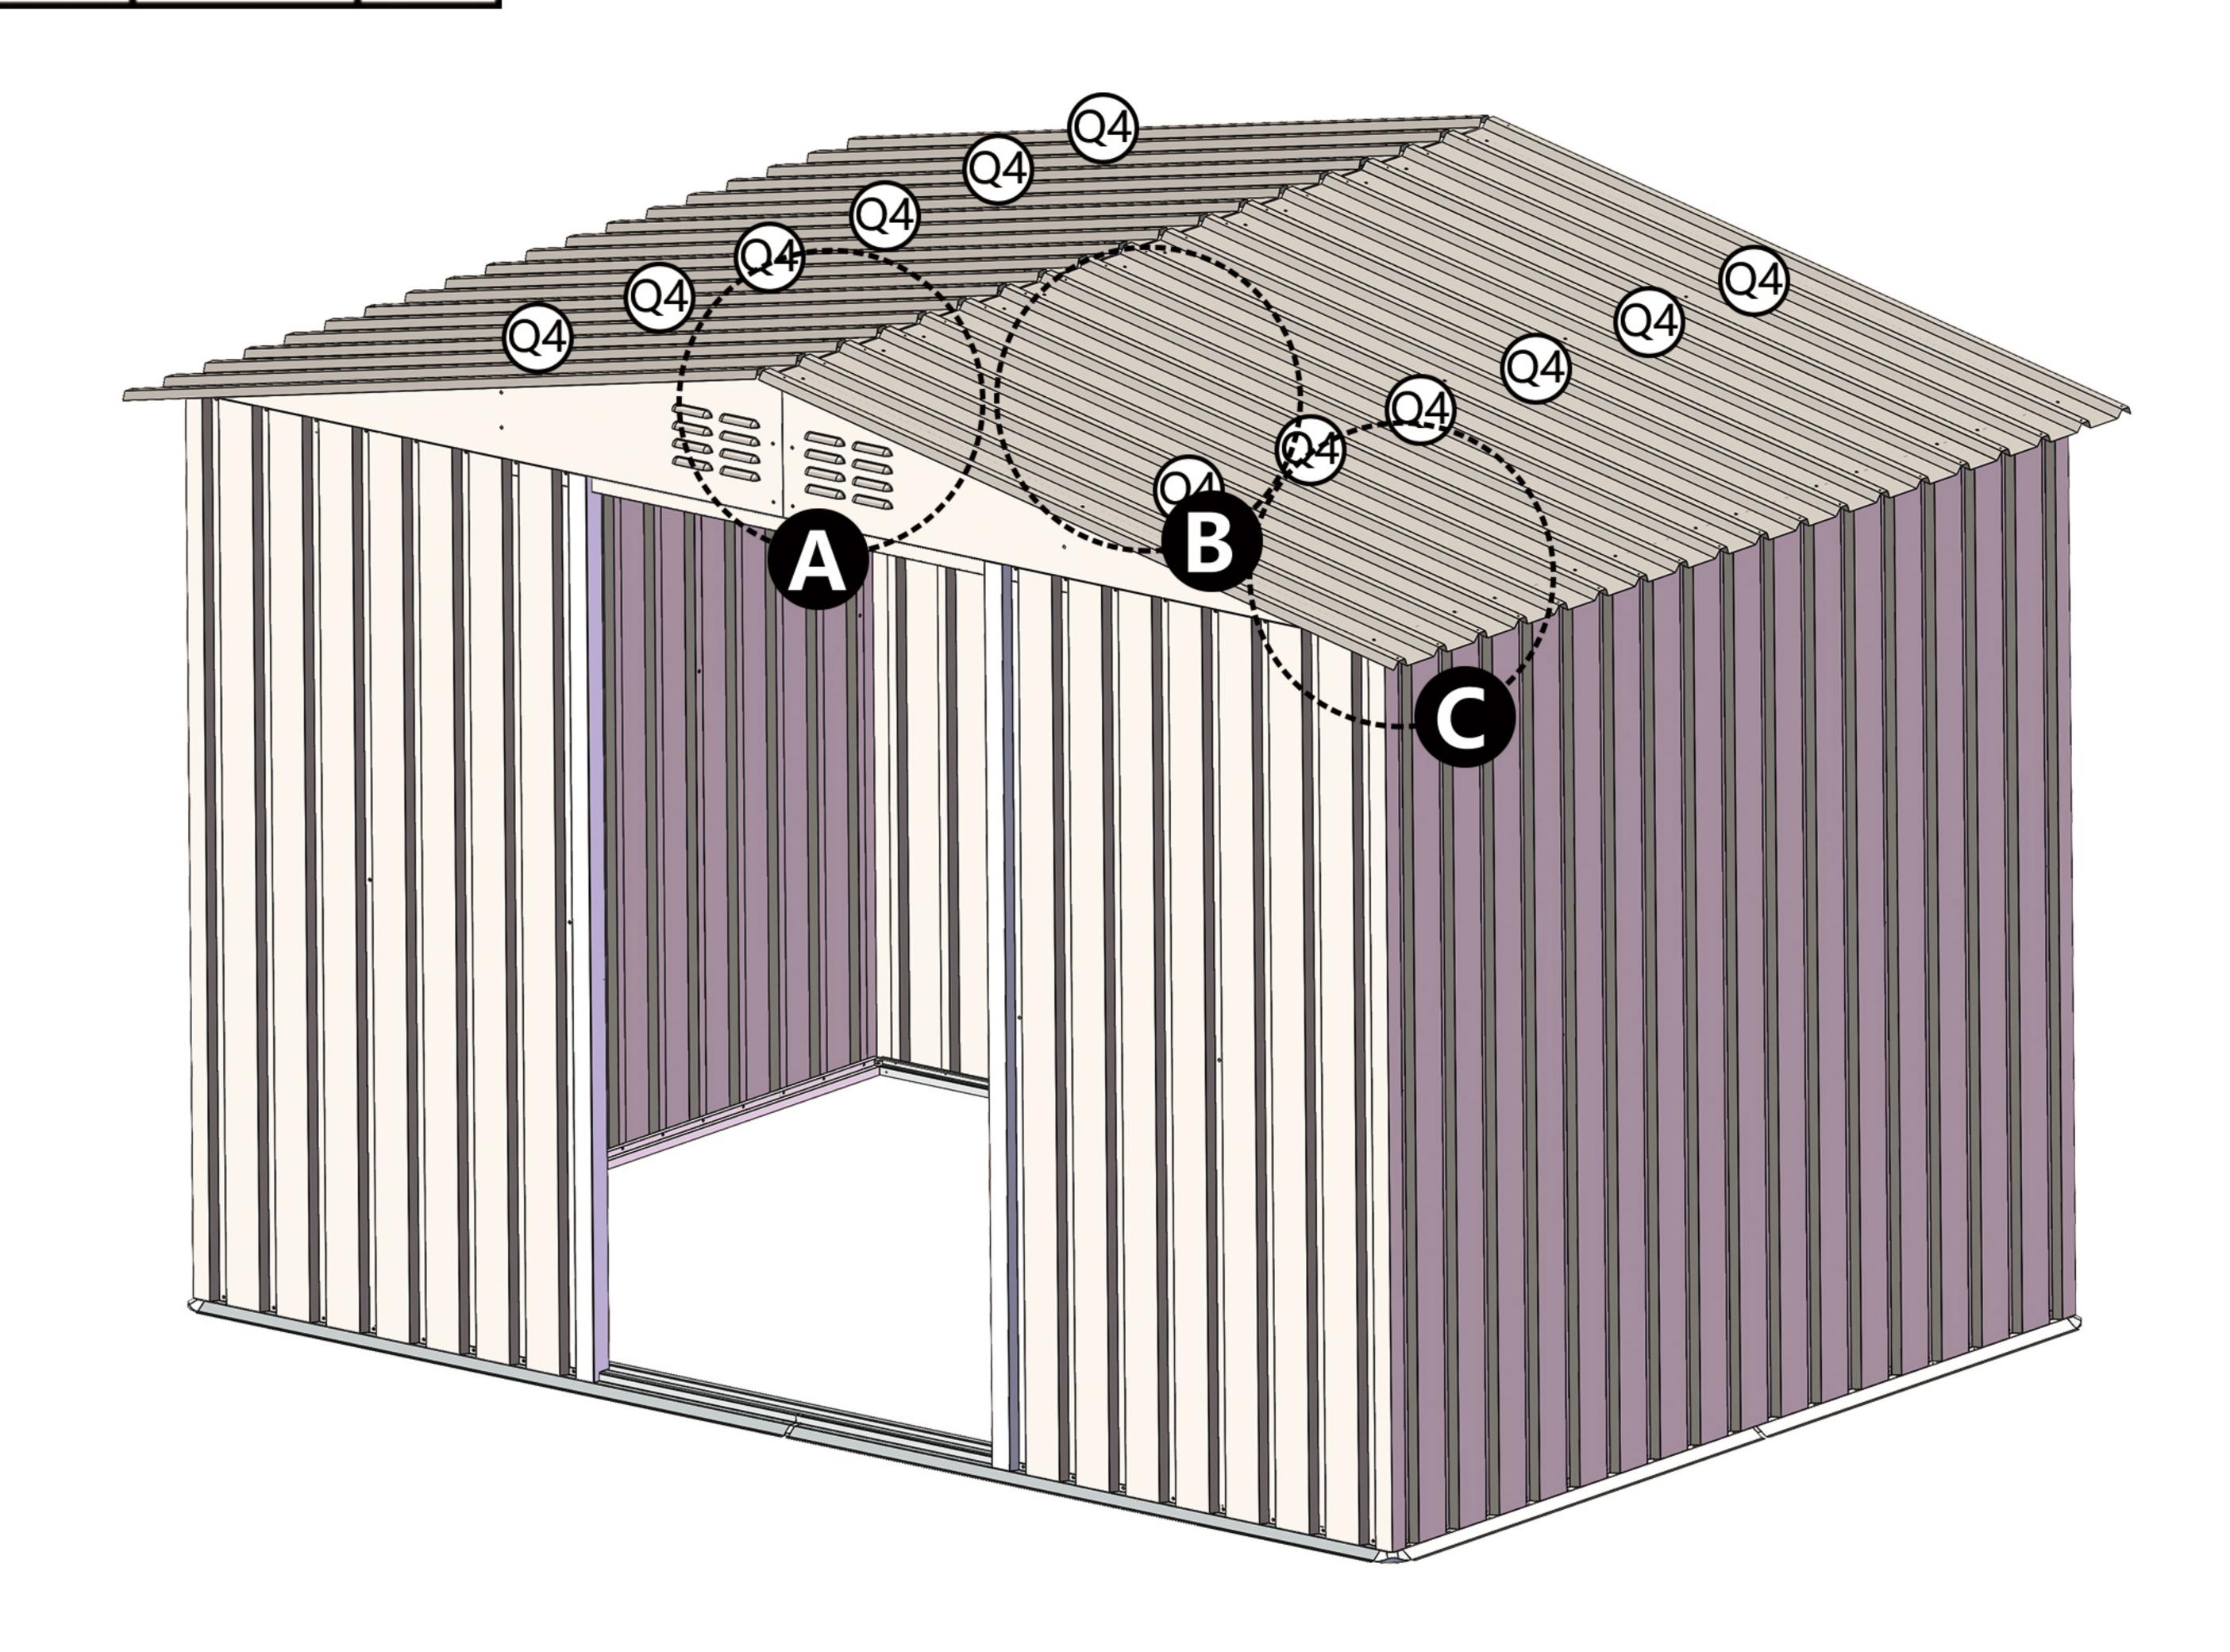

Step B: Connect two L3s and place them on L1R and L1L.

Temporarily fixed with F1, later need to remove the hole and share with Q4.

The other end of part C is fixed to the bottom hole of L3 with F1.

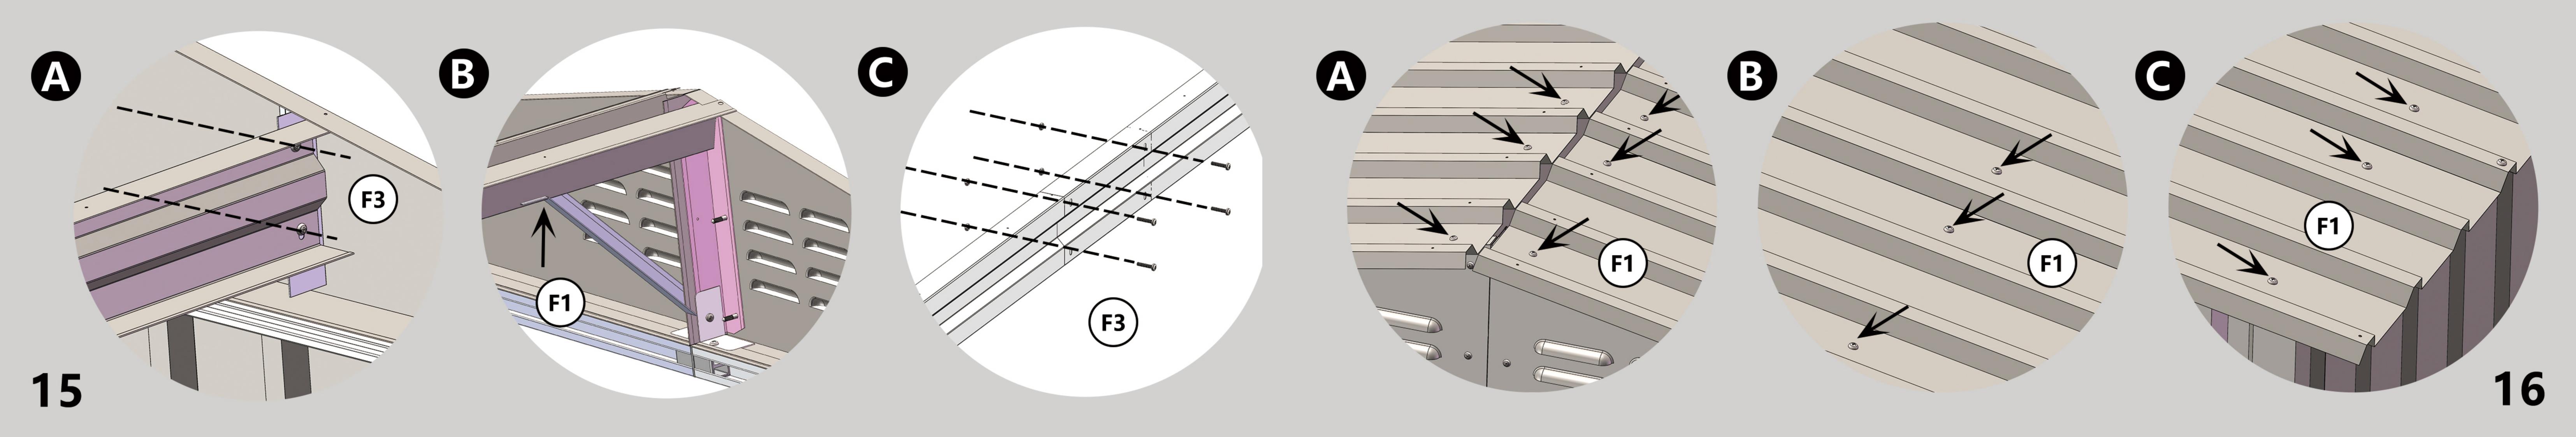

Step C: Connect LAR and LAL and install both sides outwards, as shown in the figure.

NO.	PART	Qty.
Q4		12
F1		

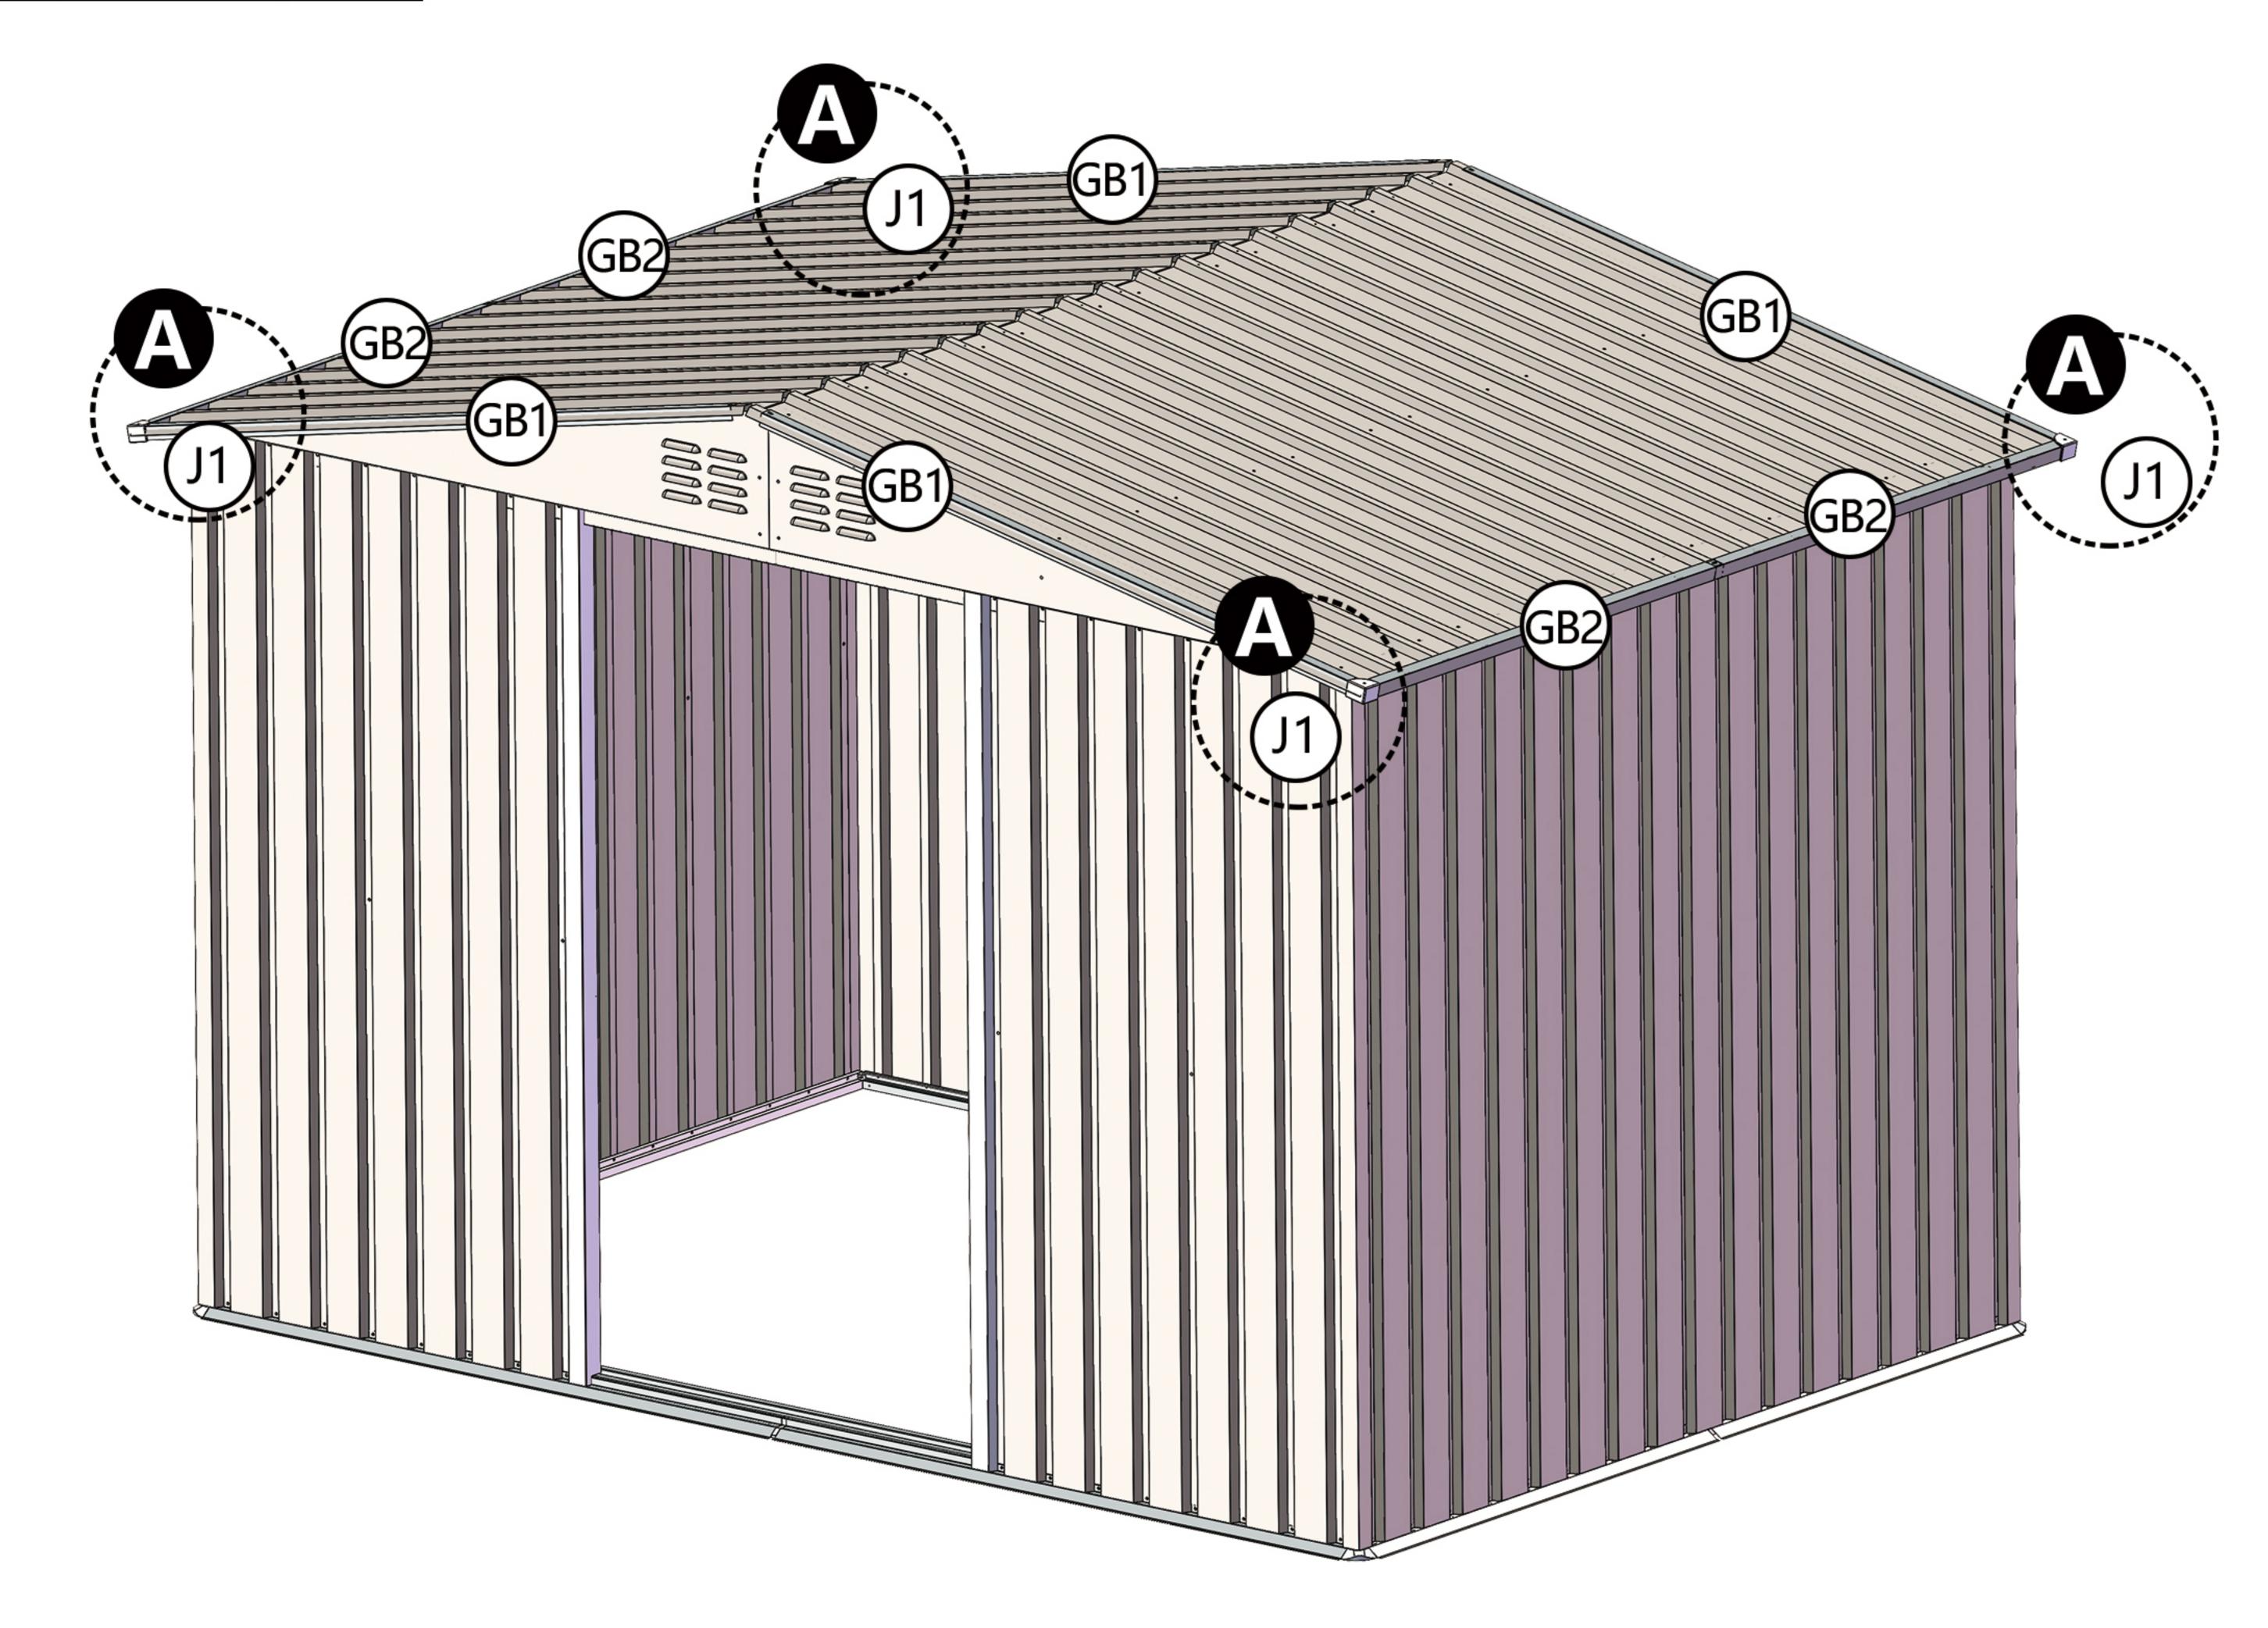

Notice:

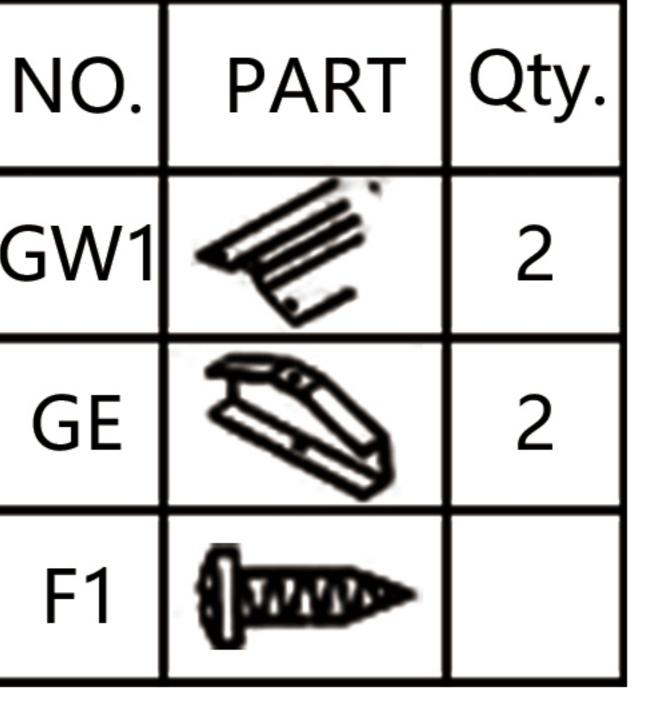

Install Q4 in sequence, overlap between every 2 pieces, and each Q4 needs 2 rows of F1 fixed.
