

Metal Garden Shed Cold Grey- 277x322cm or 9'1"x10'7"

Owner's Manual / Assembly Instructions

Requires two people and takes 3-4 hours for Installation.

Assembly Preparation Owner's Manual

Important Safety & Code Compliance

Before starting the construction of your storage building, please ensure that you check your local building codes for any requirements related to footings, location, and other specifications. Adhering to these codes is essential for the proper and safe installation of the structure.

Assembly Instructions

Before you begin assembly, review all instructions and the associated information carefully. It's crucial to follow the step-by-step sequence exactly to ensure a successful and efficient build.

Flooring Base Preparation

Location: Choose a flat, level area with good drainage for your storage building. This will ensure stability and prevent water-related issues in the future.

Foundation: The foundation is not included in the kit and may need to be purchased separately or built independently. It should extend at least 10 cm beyond the base rails of the shed. We recommend a minimum of 10 cm thick concrete slab for the foundation.

Moisture Barrier: To prevent rising dampness from the soil, place a strong plastic sheet (at least 150µm thick) beneath the foundation. This will reduce moisture buildup inside the shed, minimizing condensation and mold growth.

Anchoring: Proper anchoring is essential to prevent wind damage. After securing the structure, apply silicone along the inside of the base rail to reduce condensation.

Parts and Parts List

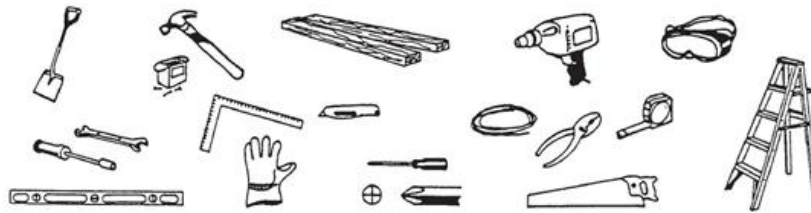

Before beginning, check to ensure all parts are accounted for by referring to the Parts List page.

Important: Do not attempt assembly if parts are missing. Incomplete assembly may lead to structural issues or damage from even mild winds.

Safety Note: Tear off the protective safety layer on the parts before assembly, but be sure to keep the part number labels if needed for future reference.

Tools You Will Need

Ensure that you have the following tools and equipment ready before starting:

Important Safety Reminders:

Safety First: Always prioritize safety. Wear protective gloves, eye protection, and long sleeves to avoid injury from sharp edges.

Teamwork Required: We recommend having two or more people for assembly to ensure ease and safety.

Proper Conditions: Choose a dry, calm day for assembly. It's also suggested to complete the assembly in one day to avoid the risk of losing small parts or causing unintentional damage to the kit.

Note: Keep small parts, such as screws, in a bowl or container to avoid losing them.

Sharp Edges: Be cautious of the sharp edges on some parts.

No Children or Pets: Ensure that children and pets are kept away from the construction site during assembly.

Avoid Roof Strain: Never place your full weight on the roof during assembly. If using a step ladder, ensure it's stable and secure.

Care & Maintenance

To ensure the longevity of your storage building, follow these maintenance steps:

Cleaning: Clean the exterior and interior of the shed regularly using a soft cloth. Water may be used for stubborn stains.

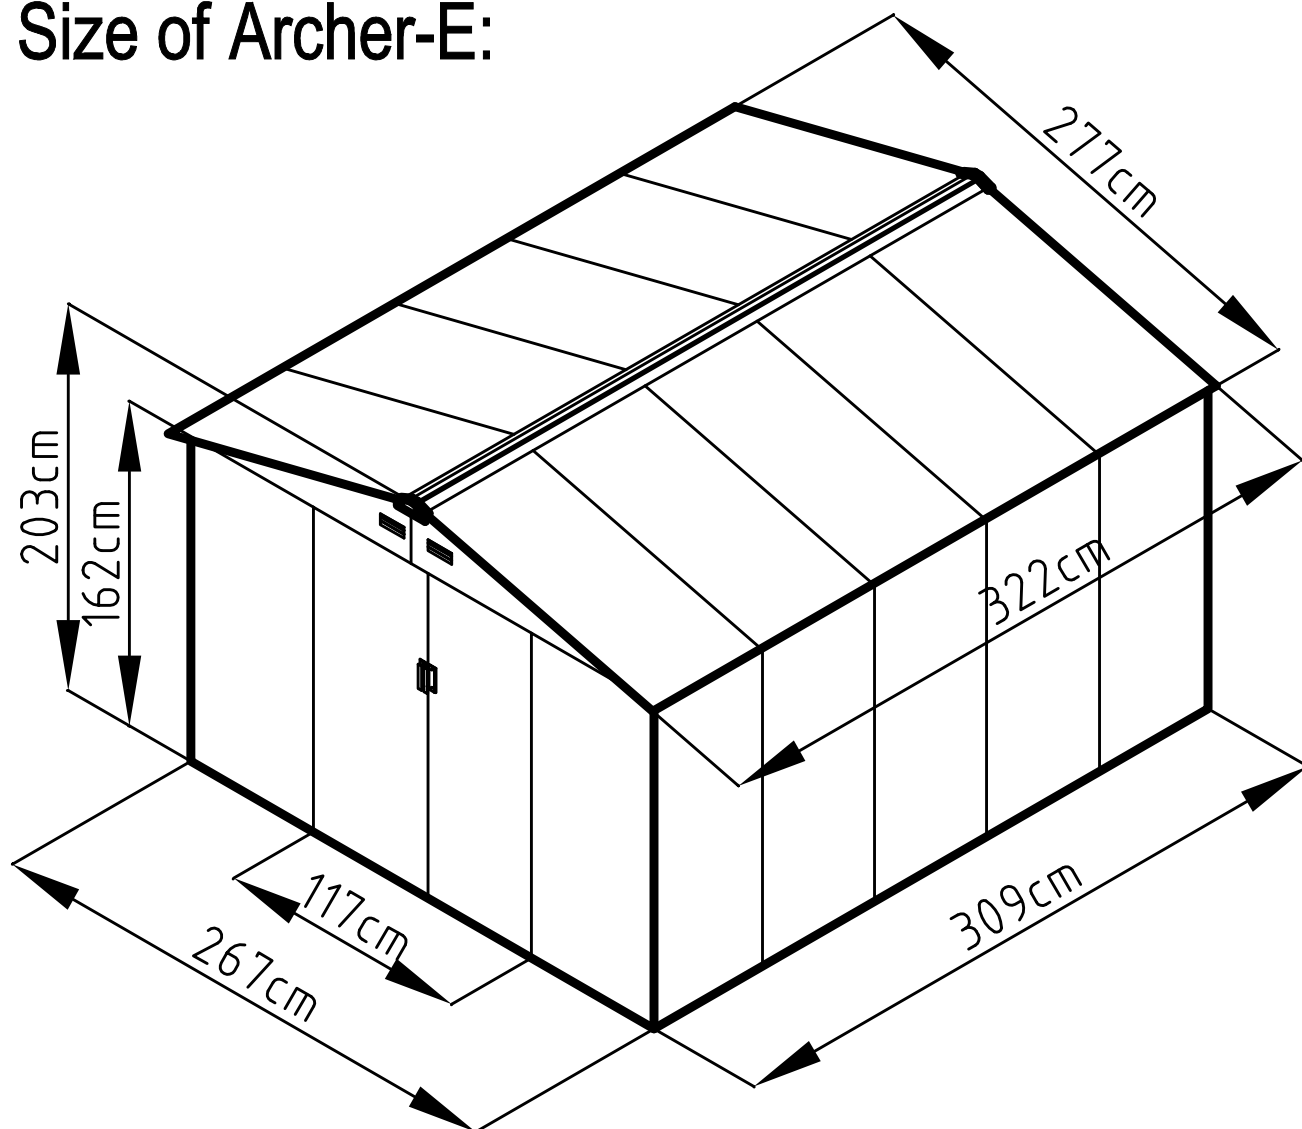

Door Maintenance: Keep the door tracks free of dirt, debris, or obstructions that might prevent smooth sliding.

Snow Removal: In winter, use appropriate tools to remove snow from the roof and doorway to ensure safe access.

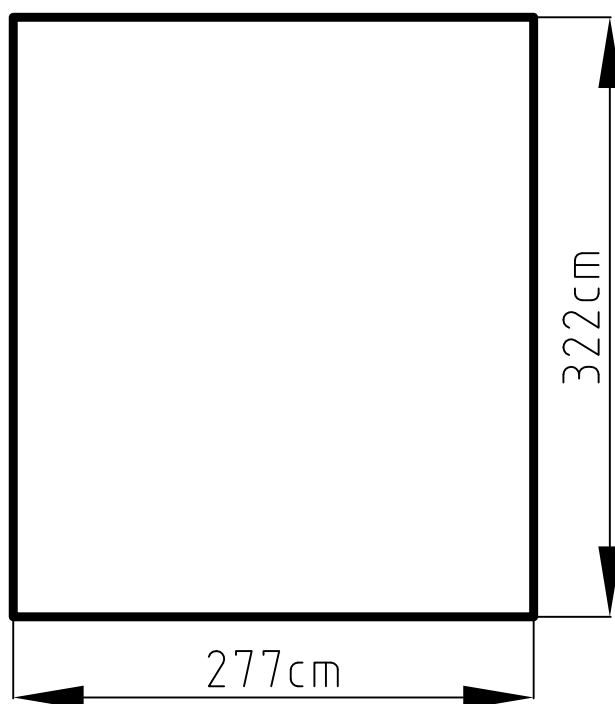

Proper Use: This shed is designed for storage purposes only. It is not intended for habitation.

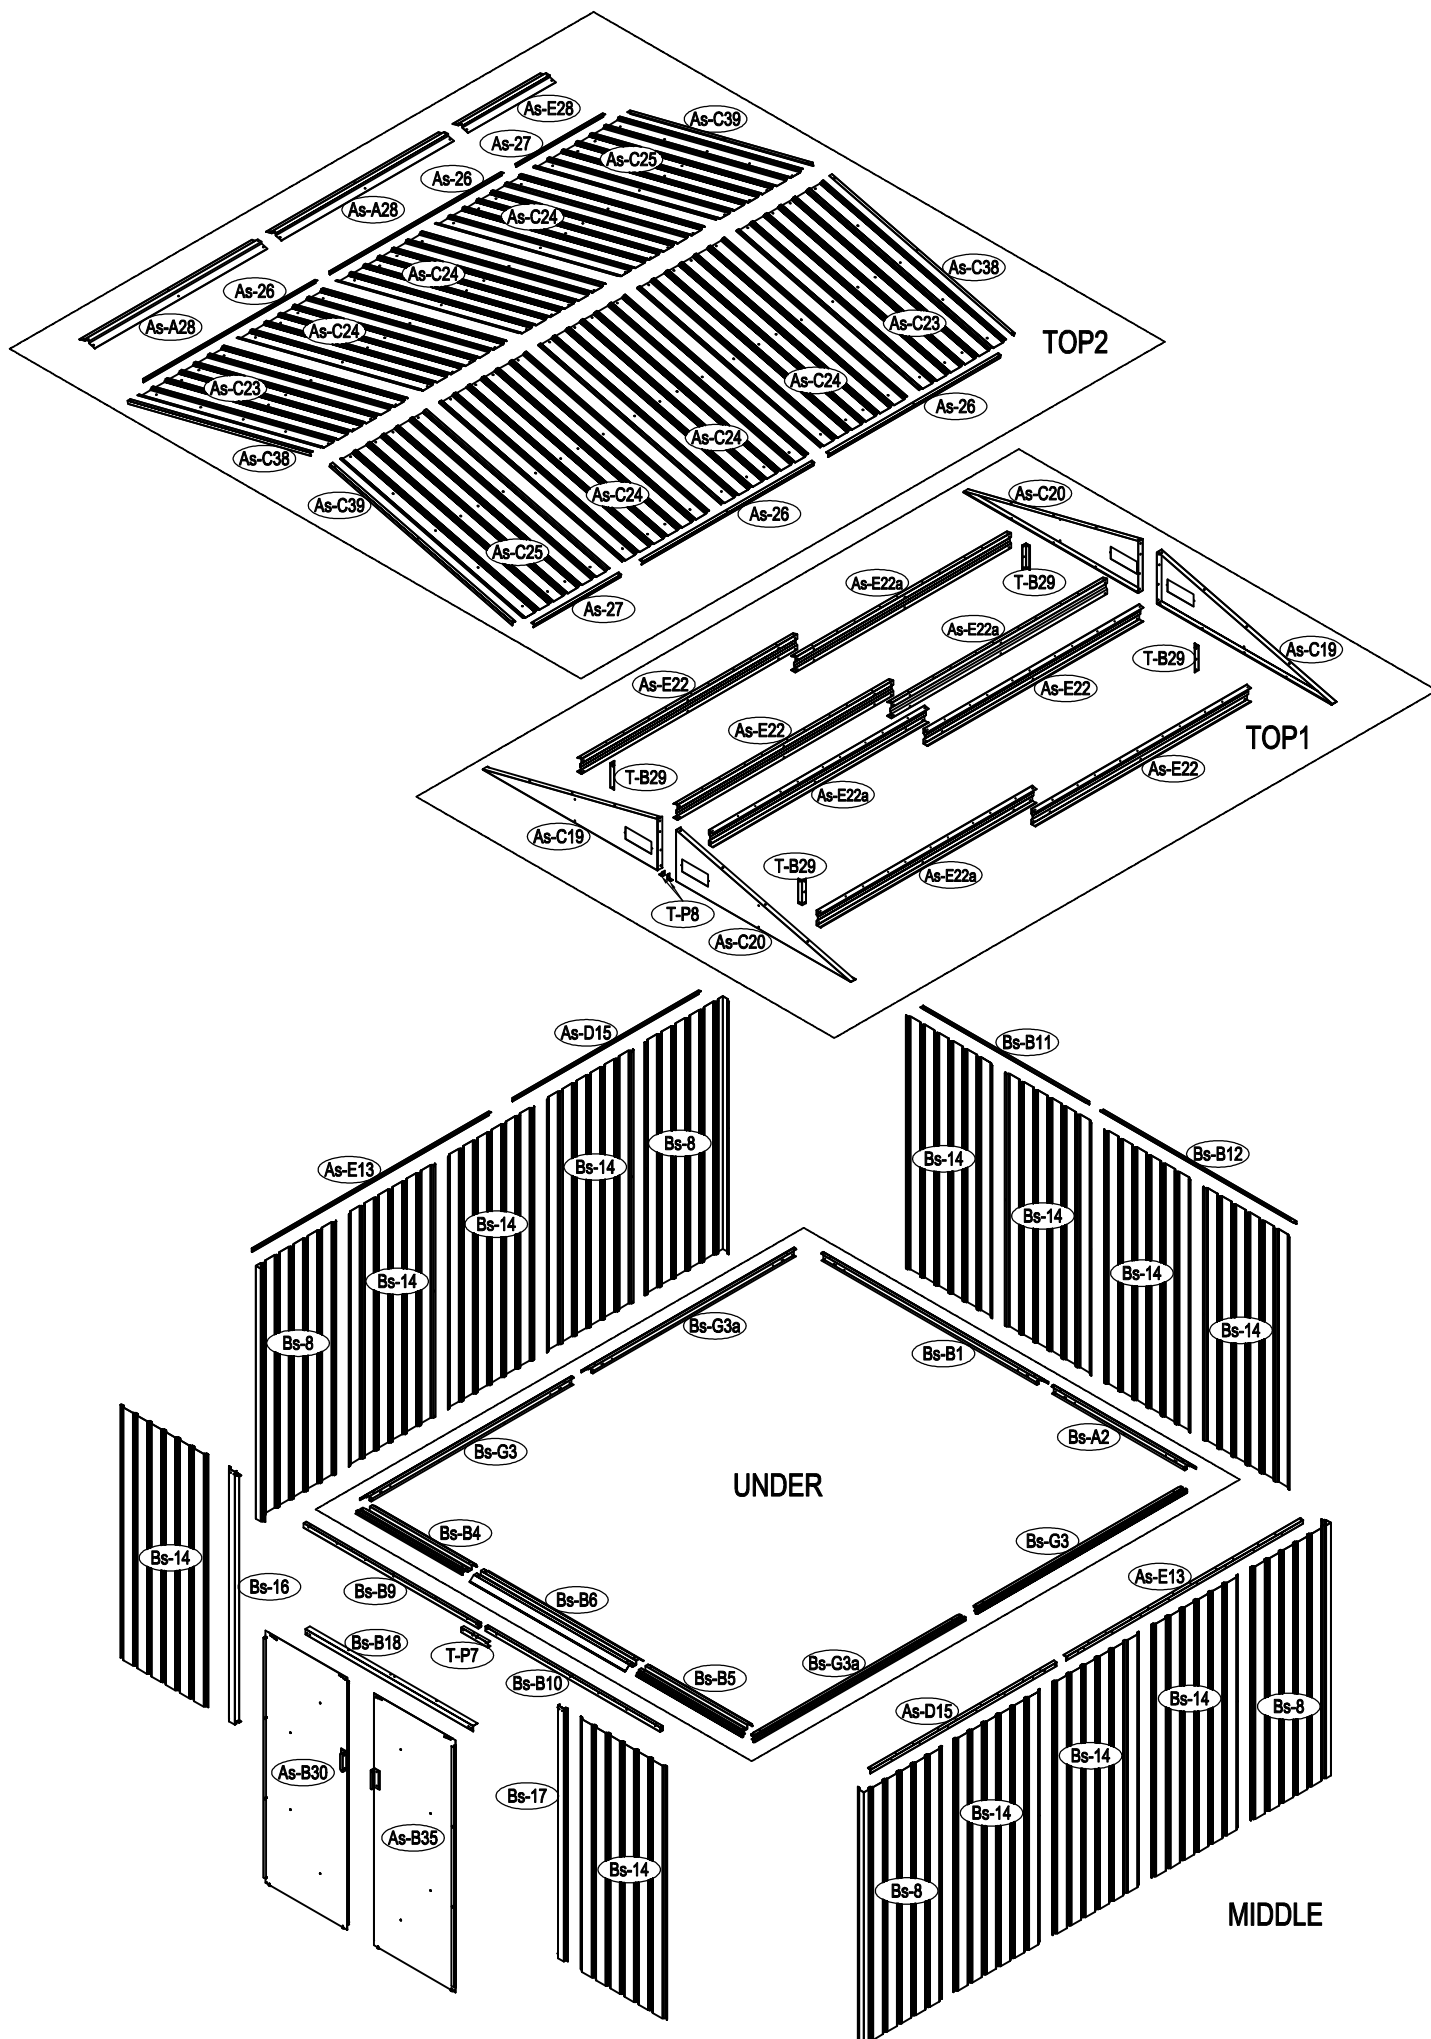

Door Sliding Maintenance: Apply a small amount of oil to the top and bottom sliding channels of the door to ensure smooth operation.
